### The Chronicle.

THE COMMERCIAL AND FINANCIAL CHRONICLE is issued on Saturday morning, with the latest news up to midnight of Friday.

# TERMS OF SUBSCRIPTION-PAYABLE IN ADVANCE:

London Office.

London Office.

The London office of the Chronicle is at No. 5 Austin Friars, Old Broad Street, where subscriptions will be taken at the prices above named.

Advertisements.

Transient advertisements are published at 25 cents per line for each insertion, but when definite orders are given for five, or more, insertions, a liberal discount is made. Special Notices in Banking and Financial column 60 cents per line, each insertion.

WILLIAM B. DANA, JOHN G. FLOYD, JR.

WILLIAM B. DANA & CO., Publishers, 79 & 81 William Street, NEW YORK. Post Office Box 4592.

A neat file-cover is furnished at 50 cents; postage on the same is 18 cents. Volumes bound for subscribers at \$1 20.

287 For a complete set of the Commencial and Financial Chronicle— July, 1865, to date—or of Hunt's Merchants' Magazine, 1839 to 1871, inquire at the office.

### MR. BLAINE ON OUR NAVIGATION LAWS.

The Chamber of Commerce partook of its annual dinner this week, at which several interesting speeches were made. Among them all, however, the most striking was that of Mr. Blaine on the decadence in shipping tonnage of the United States. As he stated the facts with his usual clearness we cannot do better than simply quote his words.

quote his words.

I suppose figures are in order before a Chamber of Commerce. You are in the habit of keeping books, calculating percentages, &c., and I will quote some figures with reference to American commerce. Why, twenty years ago.—Dr. Bellows can remember that far back.—twenty years ago.—Dr. Bellows can remember that far back.—twenty years ago, of the tonnage engaged in the United States toreign trade of the United States toreign trade of the United States.—not one-fourth is American. In 1856-57, Great Britain, the leading commercial nation of the world, had in the trade between the United States and the United Kingdom but 950,000 tons of shipping—she had 5,200,000 last year; Germany but 166,000 tons then—last year she had 950,000, as great as Great Britain twenty years ago. Norway and Sweden twenty years ago had but 20,000 tons of shipping in this trade—last year they had \$50,000 tons. Even Austria, accessible only by going around Italy and up the Adriatic, had no commerce with this country twenty years ago in vessels of her own—this last year she had 220,000 tons.

I might go on in the same way through the whole list. In this mighty increase of commerce, from 4,400,000 tons to over 11,000,000 tons in a single year of shipping, the United States has gone back, and it has all flowed into the coffers and into the channels of other nations. What other interest has gone back in this country? In manufactures we have greatly advanced. In agriculture—why, we have gone ahead of all possible calculation. In internal commerce we have gone from 16,000 to 80,000 miles of railway, and the Government of the United States, besides giving \$60,000.000, has given 280,000,000 of acres to the internal commerce of this country, and she has protected by a tariff every article that American labor or American capital would invest in and manufacture. And for the foreign commerce of this country what has she done? Left it to the alien and the stranger; and in the last ten years the value of products carried between this market and foreign countries has exceeded eleven thousand millions of dollars, on which somebody made one hundred and ten millions of dollars per annum. France, Germany, England—everybody made it except the United States. One hundred and ten millions of dollars in gold coin have gone out of this country into the coffers of other countries. Can New York stand that? Your abounding resources and your enormous advances in other departments of business can carry you over this, but if the policy of allowing the carrying trade of this country to remain in foreign hands, aggregating \$110,000,000 per annum, is to be followed, the question of specie payments becomes a much more complicated one than it is to-day. The only thing to do is to turn that enormous wealth into the coffers of the United States. I might go on in the same way through the whole list. In

This is a forcible statement of the facts. If Mr-Blaine was not clever enough to see the very plain and logical conclusion they suggested, some of his friends near him seem to have been; for he proceeded as follows.

as follows.

"Yes, but," say some of my friends near me, "tear down your navigation laws and give us free ships." As long as I am talking on this subject I am going to talk loud. [Laughter.] I am opposed to that because it does not build up American commerce. I do not believe in false trade marks; they are against public and private morality. I do not believe in taking an English ship and calling it an American ship, for it is not. I believe that in this continent every single article that goes into the construction of a ship can be had as well as in any spot in the world. You take a \$500,000 ship, representing about 3,500 tons; \$5,000 represents the cost of the original material, and \$495,000 will be for the labor put on by American hands. I am opposed to paying that out of this country; I am in favor of keeping it here. You will get a commerce that enriches us on the land by its achievements on the sea. Just so long as this country fails to become a great and triumphant commercial nation it is defeating the hands of Providence. We have 17,000 miles of coast, fronting the sea, looking to Asia and Europe and Africa. We have a larger sea frontage than all of Europe, beginning at Arctic Asia and running to the pillars of Hercules, and at the Black Sea to Trebizond. We stand in our relations to the world to-day as a central point. Ralph Waldo Emerson once said that England had the best business stand on the globe. That was so under the old dispensation. But to-day the business stands of the globe have shifted, and the United States is prepared to take the stand, and your imperial city, with its matchless position, is destined to be, under the guide of its merchants, what London has dreamed of but never yet realized. [Long continued applause, followed by three cheers for Senator Blaine.]

We find it difficult to believe that Mr. Blaine is entirely

We find it difficult to believe that Mr. Blaine is entirely honest in the statement of his reason for opposing free ships. He has told us in the previous part of his speech that the country is losing 110 millions of dollars annually because our foreign trade is all carried on in foreign

UMI

We will not stop to inquire into the basis for this statement, but accept it as a fact. Certainly, then, if Americans had bought foreign ships, and the carrying trade had been transferred to those ships, Americans would have received the freights and insurance premiums, and consequently the country would have saved the 110 millions annually. The change in the navigation laws could have been made more than ten years ago had it not been for the opposition of the Senator from Maine, and the country have saved the 110 millions each year. With this annual saving we could have bought in each twelve months 220 of his 500 thousand dollar ships, representing an increase of 770,-000 tons, or about 2,300,000 tons in three years. That is to say, these navigation laws have cost us in three years enough to have bought all the ships the United States needed for carrying on its foreign commerce; and, further, had they been repealed, we might, after those three years, have been making an annual net saving for the nation of 110 million dollars.

It must be remembered, also, in this connection, that the poor laborer for whom Mr. Blaine feels so deeply was in the country all this time, and got no benefit for these unbuilt ships. We did not buy them, and we did not build them, but we paid a gratuity to foreign nations of 110 millions a year for the privilege of not being permitted to buy them. Briefly stated, then, the actual position of the poor laborer in this transaction was about as follows: We did not build the ships, so the imaginary benefit to him did not accrue; had we bought them, there would have been a national saving of 110 millions, in which these poor laborers would have participated; but as we did not buy them, we paid out 110 millions, which had to be made good by taxation, the greater portion of which-as all taxation ultimately does-had to come out of the poor laborer.

Then, again, the Senator's argument is wholly based upon the mistaken supposition that this labor was idle all these years, was not producing, for he says he is opposed to having the 495 thousand dollars, the cost of the labor entering into the construction of the ship, go out of the country. Of course, however, the labor was producing something, and that something would of necessity have been left unproduced had the labor gone over to shipbuilding. The same man cannot raise a bushel of wheat at the very time he is shaping a steamer's hull. Hence this "opposition to paying out of this country" the money the ships would have cost involves the willingness to pay out of the country the same amount of money for producing the other thing from which the labor would have to be withdrawn. This looks very like six of one and a half dozen of the other.

Furthermore, the labor really would have indirectly constructed the ships even had the country bought them at Liverpool; for we should have paid for them with something which that same labor produced. For instance, we have during the ten years been raising wheat and cotton and beef, and making cotton goods, and today are sending all these and many other articles to Liverpool, because we can furnish them at lower prices than any other nation. If we were to buy ships there, it would be because it is cheaper, that is more profitable, for us to raise these things and thus pay for our ships than to build the ships ourselves. In either case, however, the ships are equally the product of our own labor. But we cannot follow further our Senator's statements and admissions. The country will be pleased to hear from Mr. Blaine more fully on this subject.

Evidently he has something to add to these after-dinner remarks.

### FACTS ABOUT LIVERPOOL AND MANCHESTER.

The following letter and enclosure has reached us this week and as it covers a subject of general interest we give place to it.

NORFOLK, VA., May 10, 1879.

The Commercial and Financial Chronicle, New York.

Dear Sir:—We receive the enclosed with regard to the "price of cotton" from one of our most valued correspondents in Liverpool and should be glad if you will insert it in your paper and give your views as to the soundness of its logic and start comments as your may think best such comments as you may think best.

Very respectfully,

SUBSCRIBERS.

To the Editor of the Manchester Guardian.

To the Editor of the Manchester Guardian.

SIR:—It may be in the recollection of some of your readers that eleven years ago, viz., early in March, 1868. I directed attention to the relatively strong position and abnormally low price of cotton, and ventured to predict that unless spinners forthwith resorted to short time middling Orleans, for example, which was then worth, if my memory serves me, about 7d. per lb., would command 1s. before or by the 1st of May. My hint was taken by a few, but it was not heeded by the many, who, on the contrary, rushed into the market and bought largely in excess of their requirements, the result being that it was unduly forced up to and officially quoted at 1s. a month sooner, viz., on the 1st of April, appropriately designated All Fools' Day. I then showed that if the same suitedial tactics were pursued there was nothing to stop it going to 15d. It actually did touch 13½d., and a further advance was only arrested by recourse, at the eleventh hour, to the policy which I had advocated at the outset, and but for a disregard of which I feel pursuaded we should have witnessed instead a partial rise culminating in perhaps 10d. at the outside.

Now an almost exactly similar state of things exists at the present moment, the deficiency in the total visible supply being not less than 430,000 bales (in American about 364,000)—an alarming figure on the wrong side, and yet middling Orleans is selling at or under 6½d. What, then, is to prevent it reaching 8d. before or by the 30th of June even in spite of a continuance of bad trade! Nothing that I am aware of but the adoption of short time, or an inflexible resolve on the part of spinners not to be hoodwinked by the brokers here into purchasing at one time any more than is barely sufficient for a week's consumption, as opposed to the insane custom of laying in all at once enough to cover their yarn contracts; whilst, on the other hand, with a revival of trade and a return of moderate prosperity (of which I think there are already glimmering

LIVERPOOL, April 28, 1879.

The foregoing communication of Mr. Brown appears to us to touch the weak and strong points in cotton at present. The reason for the rise, as he gives it, is that "spinners are hoodwinked by brokers into purchasing "at one time more than is sufficient for a week's "consumption", under the alarm which the deficiency in visible supply causes. We should not have expressed it precisely in the way he does, for we see no reason why brokers are to blame for a condition of things which has been foreseen for months. This scare was inevitable with human nature unchanged. The visible supply, already reduced to very low figures, was decreasing weekly, and the period of small receipts approaching, while English spinners did not hold two weeks' consumption. Such facts necessarily produce great sensitiveness, and it only required a little increased buying at Liverpool and a few storms here to set prices in motion, with nothing to stop them until spinners should decrease consumption or accumulate enough stock to make them feel safe in any probable contingency. This is history now.

The future of the market, no man can forecast. All that is possible is a statement of the facts as they exist to-day. And, first, we must admit, the turning point will not come until the English spinner realizes that he is in no danger, and abstains from buying, except in a small way. When can this be? We, of course, do not attempt to show when it will be. Our simple purpose is to inquire whether the conditions are such that it is possible on any day now. Every cautious man should make the inquiry, for the turning point must come at some time.

First, then, take the condition as to stocks of spinners. This point is of vital importance, for now that spinners have become so excited they will not stop buying e

until they have a good surplus. Mr. Ellison, on the 1st of April, gave the total in Great Britain at 124,000 bales, against 91,000 bales on the first of March. Since then they have added about 50 thousand bales more, making their stock say, the middle of May, about 175 thousand bales, with a weekly consumption of about 55 thousand bales. Continental spinners held on the first of April, according to same authority, 275 thousand bales, against 236 thousand bales March first, and probably hold now over 300 thousand bales, with a weekly consumption of 47 thousand bales. These figures show that spinners have improved or strengthened their position materially since they began buying, the first of March. It is possible, therefore, if they thought it prudent, to buy weekly during the next two months fifteen thousand bales less than consumption instead of fifteen thousand bales more than consumption, as they have been doing some of the past weeks.

Next, we must not allow ourselves at a time like this to be solely influenced by a weekly decrease in the visible supply, for the invisible supply is even of more importance, and the two should be combined before we can know the course of the actual supply. For instance, on the first of April the decrease, compared with last year, in visible supply was about 400 thousand bales, now it is about 480 thousand bales. Here is a loss of 80 thousand bales. But during that time spinners' stocks have increased in just about the same amount, as follows.

Spinners' Stocks—	April 1.	May 15.
Great Britain.	124,000 275,060	175,000 300,000
Total	399.000	475,000

Consequently the position of supply, visible and invisible taken together, compared with last year, has grown no worse during the last six weeks. Furthermore, spinners last year, according to Ellison, held on the 1st of May sixty-four thousand bales in Great Britain and 174 thousand on the Continent, so that the whole supply, visible and invisible, compared with last year is only about 240 thousand bales short, instead of 480 thousand bales. Then, again, we should remember that, other things being equal, stock in the hands of spinners is a fact of more weight against the market than stock at ports, for it enables spinners to hold off from buying for a time, as we have already stated.

Another fact to be considered is the profitableness of manufacture. Of course, if English spinners are making money they would be more eager to accumulate stock than if they were losing money, for nothing so soon takes the excitement out of a buyer as losing money on his venture. To understand the real position on this point we avail ourselves of facts and figures contained in an article in a late number of the Liverpool Post, written, we presume, by Mr. Ellison. During the eight weeks ending April 22, cotton had advanced nearly 1d. per lb. in Liverpool. The changes in yarns and goods during those weeks were as follows.

James 1 1 Time plan	March 4. April 22.		Advance in eight weeks.	
Grey Shirtings—6 lb. Common	6 0 5 1 <sup>1</sup> <sub>2</sub> 7 0 3 3 3 4 <sup>1</sup> <sub>2</sub>	s. d. 4 4 5 6 4 7 <sup>1</sup> 2 6 6 5 4 <sup>1</sup> 2 7 6 3 3 3 4 <sup>1</sup> 2	4d. per piece. 6d. " 2½d. " 6d. " 3d. " No change.	
7_lb. Medium  Mule Twist—20s Good Seconds. 30s Good Seconds. 40s Good Seconds. 50s Good Seconds.	4 112 d. 712 8 814 1012	4 3 d. 7 29 8 14 8 31 10 34	No change.  14d. per pound.  15d. "  14d. "	

The same and the same of the s	March 4.	April 22.	Advance in eight weeks.
Water Twist—20s Good Seconds 30s Good Seconds. Cotten—Middling Uplands. Middling Orleans Fair Dhollera Fair Obnrawuttee	d. 712 814 5516 5716 4516 4316	d. 8 <sup>1</sup> 4 8 <sup>1</sup> 9 6 <sup>1</sup> 4 6 <sup>5</sup> 16 4 <sup>7</sup> 8 5 <sup>7</sup> 8	%d. per pound. 14d. " 15 <sub>16</sub> d. " 7 <sub>8</sub> d. " 7 <sub>18</sub> d. "

It will be observed that in the common makes of shirtings the advance is only  $2\frac{1}{2}d$ . to 4d. per piece, or 3-16d. to  $\frac{5}{8}d$ . per lb., the rise of  $\frac{5}{4}d$ . to 1d. being in the best makes only. In T cloths two descriptions show no change, while the only one which figures for an advance gains only  $1\frac{1}{2}d$ . per piece, or barely d. per lb. The advance in yarn ranges from  $\frac{1}{4}d$ . This unfavorable showing in the relative changes in the prices of cotton and goods, is made more emphatic by a comparison with the quotations of a year ago.

167	April 23, 1878.	April 22, 1879.	Decline since last year.
	s. d.	s. d.	
Grey Shirtings-6 lb. Common	4 419	4 4	12d. per piece.
6 lb. Best	5 9	5 6	3d. "
7 lb. Common	4 1012	5 6 4 719	3d. "
7 lb. Best		6 6	1 lgd. "
8 14 lb. Common	5 7	5 412	212d. "
814 lb. Best	7 710	7 6	1 led. "
Grev T Cloths-5 lb. Medium	3 412	3 3	11ed. "
6 lb. Medium	3 9	3 410	419d. "
7 lb. Medium	3 9 4 9	4 3	6d. "
	d.	d.	
Mule Twist-20s Good Seconds.	8	712	19d. per pound.
30s Good Seconds	6	814	34d. "
40s Good Seconds	914	834	19d. "
50s Good Seconds	1114	1034	10d. "
Water Twist-20s Good Seconds		814	No change.
30s Good Seconds	9 -	819	12d. per pound.
Cotton-Middling Uplands	51516	614	516d. Wlb.adv'ee
Middling Orleans	6316	6516	18d. "
Fair Dhollera	41316	478	1 <sub>16</sub> d. "
Fair Oomrawuttee	434	518	39d. "

It was known that the position of spinners and manufacturers twelve months ago was even then very unsatisfactory. The long list of failures which took place last year leaves no room for doubt on that point. But if the position of producers was bad then, it must be worse now, as yarns have declined ½d. to ¾d. per lb. and goods 1½d. to 3d. per piece, or 3-16d. to ½d. per lb., with an exceptional drop of 5-16d. to 13-16d. in T cloths, while cotton has advanced ½d. to 5-16d. for Americans and 1-16d. to ¾d. for Surats. The tendency of such conditions as these would certainly seem to be to make spinners consume less and buy as sparingly as possible.

Do not the above facts show the wisdom of our advice of last week to planters to sell to Liverpool buyers at the ruling prices for fall delivery all they (the planters) are sure of having ready for delivery at that time of their next crop? At those rates they can now realize over 12c. at Savannah for cotton next October. That is a good paying price and should so far as possible be secured. Further than that we give no advice. Speculation we never believed in. Of course the upward movement may continue. Our crop is quite backward in some States, and when the market is so excited and visible supply so small it takes but little to keep up or to increase the excitement. Yet the question for each man in view of these facts is what are the chances? How much further is it safe to tempt good fortune?

# DECLINE IN TRANSPORTATION RATES AND ITS SIGNIFICANCE.

Not only as being an interesting subject in itself, of practical consequence in many relations, but as bearing upon the current and almost universal disposition to drive at corporations, an examination of the course of average railroad charges during the last few years is timely. Such a comparison, in case of many roads, would neither be procurable nor useful; but we give below the figures for some of the important ones, the quantities being cents and decimals.

Av.	charges	HUD.	MICH. CENT. Av.ch'rge for Fr't	Av. PP					
		Freight (ton).	(ton)	Earn- ings.	Ex. penses.	Profit.	Earn-	Fx- penses.	Profit

1874.	3,096,263	173,224,572	\$4,249,022	2.452	1.595	.857
1875.	3,170,234	164,950,861	3,922,798	2.378	1.735	643
1876.	3,119,923	175,510,501	3,664,148	2.090	1.438	.652
1877.	2,742.295	138,116,618	3,203,200	2.319	1.539	.780
1878.	2,746,032	133,702,021	3,057,393	2.287	1.166	1.121

These figures show a scarcely unbroken decline in the average rate of charges, particularly on freight, and the same thing is true in general of all the roads. In fact, going back to 1865, we find the Michigan Central charge per mile for freight was 3.06 cents, and the other roads were about the same. This very decided declinewhich has become familiar to persons conversant with the subject, but is hardly recognized yet by the general public-is of great significance, although we have not now space to point out all its bearings. Yet we must not omit mentioning one in particular, namely, that the largest and most unbroken reductions have occurred on the great roads, which are the subject of the principal apprehension and denunciation on the score of The doctrine is generally accepted that where combination is possible competition is impossible. Be this as it may, the fact is that the leading roads, which have been trying combination plans in variety, alternating with "wars," have been reducing their rates during a series of years. New York Central, as the figures above given show, now charges an average of about 9 mills per ton of freight per mile, which is less than one-half the rate of 1870, and not much more than one-quarter of that in 1865. Michigan Central has reduced its average freight rates considerably more than one-half since 1870. Lake Shore and Pennsylvania average rates have been reduced more than one-third since 1873. While the Granger laws of the West have been abandoned as unsuccessful and unwise, these reductions have been made without legislation, voluntarily in that they have been in obedience to the "higher laws" of competition and business, which statutes can never repeal or materially alter, and which, therefore, legislation should learn not to meddle with at all. The monopolies, so called, whose managers hold conferences in Saratoga, for the purpose of devouring and partitioning out the business of the people, prove not to be greedy enough to destroy the business which supports them. On the contrary, under some sort of practical compulsion and in some way, they have gone on steadily lowering their average transportation charges. Whether as bearing upon the expediency of attempting to tie them down to maximum rates by statute, or upon the consequences to be expected from letting them have their own way a while longer, this fact should be written down for a prominent place in all discussions of the subject. If it is urged that the reduction is a concession to necessity, they have had to do this, and they have done it. Thi

then it follows that the managers are not quite supreme; if the reductions are represented to be a sop to public opinion, then the managers are neither superior to nor indifferent to that opinion.

It is interesting to inquire how the reductions have been effected. After 1873, as a thing of course, there came a heavy decline in traffic and gross receipts, in the case of most roads, which was in many instances prevented from becoming a decline in net receipts by a greater decline in operating expenses. Reduction in expenses has been perhaps the most marked feature in railroad operations since 1873, at least in case of the great roads. It is difficult to make general statements about the cost of moving freight, and the figures of even the roads above named do not all present these particulars; but it appears from those we are able to give that while there is a reduction in the average rate of profit per ton per mile, the cost of hauling also declines. Reduction in cost is attained in many ways, cutting down employes' pay being only one. But another important fact is that increase of business permits decrease of rates, and this lower cost is only limited by the capacity of the engine to haul the freight; thus increase in traffic becomes one important factor in reduction of cost. Comparing 1874 with 1878, in case of Lake Shore, the tons hauled one mile increased twentyfive per cent, and the cost per mile of hauling it decreased thirty-nine per cent, this decrease operating to lessen, although not able to prevent, the decrease in the rate of profit, the rate of charge having declined thirtyseven per cent. The passenger business of this road shows a comparison still more remarkable. The number of passengers carried one mile declined twenty-two per cent, and the revenue therefrom twenty-eight per cent; the rate of charge declined six and three quarter per cent, but the cost declined twenty-seven per cent, and the rate of profit increased thirty-one per cent. Thus, although the number of passengers carried and the rate charged have decreased materially, the reductions in cost enabled the road to obtain from the work a greater rate of profit (although a smaller revenue) than in 1874.

The reduction in the rate of working expenses, however, is perhaps found not more in the increase of traffic than in improvements in the almost innumerable details which make up railroad operating. Road beds are improved; curves are straightened and grades are made more gentle; steel rails, with their great economical advantages, displace iron ones; rolling-stock is better constructed, of better-chosen materials and proportions, reducing the relative "dead weight" to be hauled; and both the economical carrying capacity of trains and the economical hauling capacity of locomotives are increased. Nor is improvement of this sort at its end-we might perhaps more correctly say that it is in its beginning. Of course, the railroads have profited by the decline in the price of every item of expenditure, including labor and fuel. But coal, under the best known conditions, is used very wastefully in steam engines, and there is a broad field open for improvement in devising practical methods of utilizing more of its heat energy. It is to be expected that the cost of train service, per ton of load moved, will yet be further reduced also by the lessening of waste through the innumerable little leaks that affect a railroad treasury. We are only beginning to learn how to use the railroad. Necessity has been teaching managers, just as it has the farmers and manufacturers, how to find ways of getting more out of materials in hand. In the struggle for existence

is one of the ways in which trouble works out good results for offset, and reviving business now finds the railroads better prepared to perform a large amount of service than before, at lower rates. This is encouraging as far as it goes; and, furthermore, does it not indicate that the railroad problem, after all, is quietly and naturally working itself out?

### Notices of Books.

THE SILVER QUESTION.—By Edward Langley.—Read March 19, 1879, before the Manchester Statistical Society.

We are in receipt of a pamphlet copy of this paper. It appears to be a review of the silver question considered from the standpoint of an intelligent Manchester manufacturer. Mr. Langley tells us that, for nearly seventy years, the defects of England's single gold standard have been concealed through the unlimited coinage act of France and the Latin Union. That act made France a kind of International Exchange or Clearing-House for England's trade with silver countries. Germany, by demonetizing silver, disturbed this quiet, unobserved movement, compelling France suddenly in 1876 to put an end to free coinage. Up to that time England was unconscious that her monetary system had its balance-wheel in the Latin Union. Now her merchants find, without quite appreciating the cause, that trade as they will with India, China, Mexico and the west coast of South America, they cannot trade at a profit, but are becoming poorer year by year.

It must be remembered, in this connection, that England holds a peculiar position in the world. She is dependent for her supplies of food, to one-third at least, upon foreign countries and earns the money to pay for them by profit on her manufactures. When manufactures cease to be profitable her course necessarily must be downward. Hence it is absolutely essential that the monetary system of Great Britain should be suited to her customers, so that there will be the least possible friction or loss in her trade arrangements. Profits now-a-days are very small, even when every step in the process of making the exchanges is perfectly adjusted. Yet, just now, England finds a barrier suddenly erected between her and her customers; their money is not her money, and there is no way of adjusting accounts except indirectly, and that through a fluctuating bullion market, which, as experience has taught us, may be one thing to-day and quite another to-morrow. Consequently, all her trade with silver countries is demoralized and unprofitable, and England, instead of accumulating wealth by means of her manufactures, is trading at a loss. She is a wealthy country and can bear this drain for a time, but the end cannot be doubtful if the obvious remedy is not applied.

But again, there is another evil of the present system, and that is—one we have often referred to—the fight for gold which must sooner or later come between the countries of Europe. The gold famine of last summer should have been sufficient to have enlightened English statesmen. Gold production is decreasing, and probably will not exceed \$100,000,000 this year. The United States will retain its supply. France has been able to provide for Great Britain's emergencies heretofore, furnishing England all the gold required on the occurrence of any panic or symptoms of one; but it seems as if that resource were likely to fail for the future, judging from the late returns of the Bank of France, its stock of gold having fallen from (as we showed in the CHRONICLE of April 5, page 338) 306 million dollars Dec. 31, 1876, to 166 million dollars Dec. 31, 1878. These figures, in Mr. Langley's opinion, seem to point to a period, not far distant, when that Bank may think it its duty not to permit any further reduction in stock. Such a condition, however, needs no comment; it shows a point of great weakness; or we should rather say that it brings to the surface a peculiar and dangerous defect of the single gold standard, and wise men would provide against it.

Once more, England has in India another strong argument for bi-metallism. We have urged this point frequently, but Mr. Langley puts one branch of the case in a little different shape. The burden to a silver country of a gold debt payable in London is increased at the rate of 2 per cent for every fall of one penny in the ounce of silver. India has such a debt requiring her to pay £17,000,000 annually in London. The loss the present year on the cost of placing this amount in London will be not less than £4,000,000, or say \$20,000,000. For every

further fall in silver of one penny per rupee this loss will be increased £700,000 yearly. As the price of silver with occasional upward fluctuations, must always be downward, one can easily see not only the present cost of mono-metallism to the tax-payers of India, but how greatly and rapidly the cost may be increased if this evil is not speedily arrested. It cannot go on without, in the end, leading to greatly increased taxation and its consequent evils.

Economic Monographs.—"National Banking," "Honest Money and Labor," "Hindrances to Prosperity," "Suffrage in Cities," "Free Trade promoting Peace, &c." Pamphlets, New York: G. P. Putnam's Sons, 1878-9.

Mr. M. L. Scudder, Jr., of Chicago, has written an essay on the merits of the National Banking System, which appears as No. 12 of the Economic Monograph series, and is noticeable at sight by being published for the "Honest Money League of the Northwest." Beginning with showing that Mr. Lincoln earnestly favored that system, among other reasons, for being an escape from increase of government paper, he argues that it has in every respect fulfilled the expectations of its founders. He shows conclusively-what has been so often and convincingly shown already, that nobody making pretense of intelligence can be ignorant of it, except wilfully-that national banks are in no sense a monopoly, unless it is monopoly for one man to own more capital than another; that the losses to depositors and general creditors by failed banks have been comparatively trivial; that stockholders have not, on the whole reaped extraordinary profits; that circulation is not a valuable privilege; that the bank notes have been simply perfect as an instrument of circulation in point of safety, uniformity of value, and convenience; and that there is no great. advantage obtained by the banks themselves from the system, but that the public at large are mainly interested in its continuance. Of course, the banks never pretended to be philanthropic institutions. They have in times past made something out of the system, undoubtedly; but the Government has made more; and the people, over and above the Government advantage, have made the most. A system which has thus worked to the profit of all parties has certainly established claims to consideration that only a very unquestionable argument can outweigh. Much more to the point of resisting the anti-bank sentiment, however, is the argument that in place of the old cost of exchange-which in Chicago, sometimes reached as high as 25 per cent premium on New York drafts and varied ordinarily from 1/2 to 11/2-the cost of express transportation of currency to the creditor point is now the maximum cost because of the simple fact that the currency circulating in any place is always at par value in every other place. The discount on the best bank-notes of the West and South, says Mr. Scudder, was formerly ½ to 1½, up to 5 for those of smaller local banks, and he argues that the saving of exchange and discount-snjoyed principally by the West and South-is greater than the interest on the deposited bonds of the banks, and greater than all bank dividends. The practical usefulness of Mr. Scudder's essay is the more evident because it is intended for circulation in the sections where the anti-bank feeling is strongest, and because it shows that those very sections have, on the contrary, the largest interest in sustaining the banks.

-Somewhat akin to Mr. Scudder's essay is that of Secretary Schurz on "Honest Money and Labor," delivered in Boston last October, and now reproduced as a pamphlet. In giving but little space to it we do not place it in disesteem, but it is not easy to review at length a demonstration of truth as elementary and natural as would be an argument that industry and common sense prove more profitable than idleness and folly. Traversing well-beaten ground, Mr. Schurz argues conclusively that repudiation falls heavily upon the poor; that uncertainty about the future and fluctuations in prices are consequences inseparable from unredeemed paper, and that these consequences become, to the worker for wages, reduced pay and irregular employment; that wages never rise as quickly or as far as prices of necessaries do, and that stagnation and distress always follow; that the capitalist has some power to protect himself, while the laborer has none; that bad currency cheats the laborer worst of all men; that inflation could not help the debtors; that its natural effect would be to make debts rather than discharge them; and that new issues would not now have the former effect upon prices and activity. Every one of these propositions has been urged in these columns repeatedly, and we wish Mr. Schurz's plain, sensible talk on the subject could be read aloud to the assembled workmen in every large establishment in the country, in order that they might really take in the truth that paper money, unsustained by coin, is the worst

enemy of labor, albeit it claims to be a friend.

-Mr. Simon Sterne is author of Nos. 7 and 13 of the pamphlets before us-"Hindrances to Prosperity in the United States" and "Suffrage in Cities." In the first, while admitting that this country has done remarkably great things in development, he argues, by comparing the condition of the country, at the date of its national beginning, with that of the leading countries of Europe, that, considering the advantages enjoyed here of starting free from the hindrance of past troubles and the need of maintaining standing armies, without the burden of debts, and with an untouched soil of unequalled fertility, as well as with vast mineral endowments, this country has not done as well as Europe has during the same period. The causes of retardation Mr. Sterne considers to be mainly: the character and developments of politics as an occupation; the "division of employments and specializing of functions," which create a special governing class, and, on the other hand, make resistance by any individual impossible except at the cost of non-success in his own special avocation. The constitutional safeguard against private legislation in this State, he argues, has been practically nullified by the court decisions and by the practice of amending general laws to fit private cases. He then gives an interesting sketch of the English method of dealing with private bills, which we briefly summarize: Two months before Parliament meets, each private bill must be filed in the "Private Bills Bureau" of the Commons, notice being immediately given to all interested parties, who may proceed to file objections or suggestions; before the bill goes to committee, it must pass through the hands of special examiners, who scrutinize all the steps already taken by the Parliamentary Agent-who is a functionary standing to the Parliamentary committees in the same relation as the attorney of the common-law court does to those tribunals-publication of the nature of the subject having already been made in the newspapers. Any appearance of fraud, or any material irregularity in the course of proceeding, throws out the bill at this stage, as to that session; otherwise, it is referred to a subcommittee; then, if objections have been filed, to the calendar for trial, at which the issues are heard as though in a trial at law. After some other steps, varying with the nature of the subject, the bill reaches Parliament; the necessary expenses of this examination must be provided, at the start, by the applicant, and public bills are so given the right of preference that they cannot be crowded out of place by any private ones. The difference between this practice and that of the States here which have sought to regulate the evil of private bills, is that the latter attempt to rule them out while Great Britain takes them up in such a way that they can neither obstruct public matters nor do wrong to opposing interests, public or private.

"Suffrage in Cities," No 7, is also by Mr. Sterne. In

it he argues that suffrage is a natural right, in the ense that it is a shield to the user against aggression by Government, but is at the same time also a sword by which the ignorant may and do inflict on others worse hurts than those from which it protects them. These two elements-protection to the holder, and the power to aggress upon othersvary as the object in respect to which the suffrage is exercised is a governmental, a quasi-governmental, or a private-property interest. Thus, as to general-government matters, all are concerned and should have suffrage, the element of protection being at its maximum and that of aggression at its minimum, in the hands of each person. But as we come down to municipal administration, the shield becomes smaller and the sword larger. Mr. Sterne proceeds to argue forcibly that the share of each person in the city's welfare is too small and remote to earry weight with him against an immediate interest; as, for example, when a promise of fifty cents a day of excessive wages on the public works is balanced against fifty cents a month more tax, in the case of a voter who does not own property. He builds an argument from this idea for the practical justice and feasibility of the plan of Governor Tilden's Municipal Commission (of which he was a member) to confine city financial administration to the property classes. In England, France, Germany, the Netherlands, Spain, and Australia, suffrage in respect to municipal administration is not unlimited, and, with regard to that, Mr. Sterne would reverse the old maxim of 1776, to read, no representation without taxation.

—Of Mr. C. L. Brace's essay, No. 16, on "Free Trade as promoting Peace and Good Will among Men," we need only say that

it is not a practical discussion of the subject in an economical sense, but deals with it rather after the manner appropriate to peace societies. The aim is to show how the hatreds and wars of early centuries, growing in part out of trade jealousies, have disappeared under the gradual refuting of the barbarous notion that trade is a fixed quantity in which no nation can obtain a share except by contesting it with, and wresting it from, some or all of the rest. Freedom and fulness of commercial intercourse—runs the argument which, we opine, cannot be denied anywhere as an independent proposition—tends to better knowledge of one another by the nations, and to the maintenance of

Apart from the importance of their subjects, and the ability and breadth of their treatment, these "Economic Monographs" have the decided good quality of being so brief and convenient that if any writing more full than that of the press on economic matters has a reasonable chance of finding many readers, these must be read, and, being sound in doctrine, they must

be wholesome in influence.

THE ASTOE LIBRARY, New YORK.—The Annual Report for 1878, containing reports of Superintendent, &c.

This is the thirtieth annual report of the Trustees of the Astor Library. It is gratifying to find that this public institution continues to flourish and to fulfil the purpose of its existence, under the fostering care of the family whose name it bears. The report of the Superintendent, Mr. Robbins Little, is very satisfactory. It is just a year since Mr. Little entered upon his duties as Superintendent, and his ability, energy, and kindliness of manner have not been without decidedly good results. In the buildings themselves, such changes have been made as have added to the security and utility of the property; the selections of books have been excellent, and many improvements in the use of the books have been carried out. One result is seen in the fact that the circle of those who use the library has been very considerably extended, the number of readers last year having been 53,252, an increase of 1,000 over the previous year. The number of readers and the number of books read have both been doubled since 1869. It appears that the number of persons who seek permission to study in the alcoves is increasing year by year, there having been during last year no fewer than 7,894 of such students. During the year the trustees have been made the recipients of some valuable bequests; and some 2,342 volumes have been added to the library. The total number of volumes in the library is now 183,245, showing an increase of over 44,000 since 1869.

Sugar and Rice Crops of Louisiana of 1878-79.—Compiled by the New Orleans Price Current: Louis J. Bright & Co.,

publishers

We are indebted to the New Orleans Price Current for a pamphlet copy of their statement of the sugar and rice crops of Louisiana for 1878-79, 8 vo., pp. 196. The totals of the product of the various parishes of the State have already been given, as soon as ascertained, in the columns of that journal, but the pamphlet before us gives full details of the production, showing not only the number of hogsheads, but the weight of the sugar, the barrels of molasses and barrels of rice made, and contains much additional information essential to a correct comprehension of these great home interests. Included in these details are the names of the planters and of the plantations; their distance from New Orleans; the planter's Post Office address; the description of sugar house, whether of wood, of brick and shingled, of brick and slated, or of any other material; the apparatus in use, and the motive power employed, whether horse or steam power, whether open kettles, vacuum pans, strike pans, vacuum and centrifugals, steam trains, rillieux apparatus, etc., or combinations of the various appliances. These details convey a more correct idea of the various modes of sugar-making than any general statement, and indicate the large amount of capital invested. Full details are also given of the plantations worked on shares. With regard to production a statement is given of the acreage in cane on each plantation; the yield of sugar per acre, in pounds; the area to be planted with the seed cane saved, and other matters connected with the production, of practical value to all persons interested in the culture, and of interest to the general reader.

The following is the recapitulation of sugar and rice crops for the crop years 1878-9 and 1877-8.

	Su	gar.	Molasses,	Clean Rice,
Totals, 18 <sup>-</sup> 8-79 Totals, 1877-78	Hhds. $208,571^{1}_{2}$ $125,100$	Weight, lbs. 251,088,860 149,469,209	bbls. 322,044 <sup>1</sup> 2 323,247	bbls. 162,179 8 140,785
Increase	83,47112	101,619,651	*1,20212	21,394.8

The Sugar Book, when of hardly more than half the size of the present pamphlet, was published at \$5 per copy, which was no more than a reasonable price to compensate the compilers and publishers for their labor and capital, but the *Price Current*, in order to give their statement a wider circulation for the benefit of the sugar interest, reduced the price to \$3 per copy, with special rates for a larger number.

[From our own correspondent.]

London, Saturday, May 3, 1879.

I The feature in the money market this week has been a fall in the French and Dutch exchanges which admits of the export of gold to France and Holland at a profit. Some gold has already been sent away, and the value of money here has, in consequence, somewhat improved. Gold coin, however, continues to be received from provincial circulation, the decrease in the supply held by the Bank being for the week only £75,158. The total stock is as much as £33,695,647, against £22,827,226 last year; while the reserve of notes and coin amounts to £19,-332,992, against £9,660,756 in 1878. The proportion of reserve to liabilities has not materially varied since last week, it being 50.39 per cent against 50.19 per cent. At this time last year it was only 32.57 per cent. It is not generally believed that the improvement which has taken place, slight as it is, will be lasting, as trade is reported as very quiet throughout Europe, with scarcely any tendency to improvement. There are, in fact, complaints from most parts of this country and from the Continent as to the state of business, and the improvement which has been hoped for so long still seems to be as distant as ever. The greatest economy prevails, and this is assisted by the coldness of the spring, which, naturally, induces prudent people to continue the wear of their winter clothing. To the business section of the community, however, the delay in the arrival of genial weather is very unprofitable; but, no doubt, there will be some heavy demands upon them as soon as the weather becomes warm. This week, snow has fallen abundantly in parts of the south and southwest of England, and the Malvern Hills, in the Midland counties, are reported to-day to be partially covered with snow. Vegetation, however, though backward, is healthy, and the agricultural prospect is regarded as satisfactory.

When the French and Dutch exchanges relapsed on Wednesday, the London money market assumed a firmer appearance. Some gold was taken out of the Bank, and it was thought possible that the movement would continue. The "liquidation" on the Paris Bourse having been completed, the exchange has become more favorable to us, and no more gold has been withdrawn from the Bank. The money market is now decidedly quiet, and the rates of discount are as follows:

Per cent.   Bank rate.   2		. 136014
----------------------------	--	----------

The rates of interest allowed by the joint-stock banks and discount houses for deposits are subjoined:

Annexed is a statement showing the present position of the Bank of England, the Bank rate of discount, the price of consols, the average quotation for English wheat, the price of Middling Upland cotton, of No. 40 mule twist, fair second quality and the Bankers' Clearing House Return, compared with the three previous years:

There is a strong demand for investments of a sound description and amongst these Colonial government securities still hold a high position. Colonial loans have of late been very numerous, but most of them have been quickly taken up, and they are now quoted at high prices. Yesterday tenders were received on account of the Government of New South Wales for £3,249,500 in 4½ per cent debentures at the Bank of New South Wales. The applications amounted to as much as £7,860,900. All tenders at £98 8s. received about two-thirds of the amount applied for, and those above that price in full.

Rather more gold has been exported this week, but the market has again assumed a quiet appearance. Tenders were opened at the Bank of England on Wednesday for £250,000 in India Council bills, £213,700 being allotted to Calcutta and £36,300 to Bombay. Tenders on both Presidencies at 1s. 7 3-16d. received about 14 per. cent, and above in full. The silver market has been steady during the week. The following prices of bullion are from the circular of Messrs. Pixley & Abell:

	GOLD.		8.	d.	8.	d.

The Council of Foreign Bondholders announce that in consequence of its being necessary to communicate with the Governor of Virginia, in reference to the mode of carrying into operation the Funding Act recently passed by the General Assembly of Virginia, a delay has unavoidably arisen in calling a meeting of Virginia bondholders in London to consider the terms of the Act. It will, however, take place at the earliest possible date.

Sir John Lubbock has issued the subjoined statistics, showing the working of the Bankers' Clearing House for the year ended on the 30th April, 1879, which is the twelfth during which these statistics have been collected. The total amounts for the twelve years have been:

Total for the	On Fourths of	On Stock Exch'ge	On Consols
year.	the month.	account days.	settl'g days.
£	£	2	£
1867-683,257,411,000	147,113,000	444,443,000	132,293,000
1868-693,534,039,000	161,861,000	550,622,000	142,270,000
1869-703,720,623,000	168,523,000	594.763,000	148,822,000
1870-71 4,018,464,000	186,517,000	635,946,000	169,141,000
1871-725,359,722,000	229,629,000	942,446,000	233,843,000
1872-736,003,335,000	265,965,000	1,032,474,000	243,561,000
1873-745,993,586,000	272,841,000	970,945,000	260,072,000
1874-756.013.299,000	255,950,000	1.076,585,000	260,338,000
1875-76 5.407.243,000	240,807,000	962,595,000	242,245,000

1877-785,066,533,000	224,190,000	745,665,000	233,385,000
1878-79 4.885.091.000	212.241.000	811.072.000	221.284.000

The total amount of bills, cheques, &c., paid at the Clearing House during the year ended 30th April, 1879, shows a decrease of £181,442,000, as contrasted with 1878. The payments on Stock Rxchange account days form a sum of £811,072,000, being an increase of £65,407,000 as compared with 1878. The payments on consols account days for the same period have amounted to £221,264,000, showing a decrease of £12,121,000 as against 1878. The amounts passing through on the fourths of the month for 1879 have amounted to £212,241,000, showing a decrease of £11,949,000 as compared with 1878.

d The chief movements on the Stock Exchange have been in Egyptian stocks, the value of which has fluctuated considerably.

At one period, the market was very depressed, but latterly there has been some influential buying here, in Paris, and at Alexandria, and a decided recovery has taken place. Specula-

tors for the fall have also been desirous of closing their accounts. British railway shares have improved in value; but for American descriptions there has been less demand, and the quotations are rather weaker. United States Government bonds, however, have been firm, and their value has had an upward tendency. The preference and debenture stocks of British railway companies are still in demand, but the quotations are now at a high point.

Upon application being made this morning to Vice Chancellor Bacon by a large bondholder who had deposited his bonds with the Atlantic & Great Western Re-organization trustees, Messrs. Lewis, Balfour and Bates, in support of the revised scheme dated 21st July, 1875, an interim injunction was granted restraining these trustees from carrying into effect the lease they propose entering into with the Erie Company.

Although the season is backward, the trade for cereal produce is still very inanimate, but prices have not varied to any important extent. Holders, however, have experienced some difficulty in obtaining previous quotations.

The following figures show the imports and exports of cereal produce into and from the United Kingdom since harvest, viz., from the 1st of September to the close of last week, compared with the corresponding period in the three previous seasons:

1 01			
IM	PORTS.		
1878-9.	1877-8.	1876-7.	1875-6.

During the week ended April 26, the sales of home-grown wheat in the 150 principal markets of England and Wales amounted to 53,483 quarters, against 38,354 quarters last year; and it is estimated that in the whole kingdom they were 214,000 quarters, against 153,500 quarters in 1878. Since harvest the sales in the 150 principal markets have been 1.858,864 quarters. against 1,460,787 quarters; while in the whole kingdom it is computed that they have been 7,435,700 quarters, against 5,851,000 quarters in the corresponding period of last season. Without reckoning the supplies furnished ex-granary at the commencement of the season, it is estimated that the following quantities of wheat and flour have been placed upon the British markets since harvest:

1878-9.	1877-8.	1876-7.	1875-6.

### Commercial and Miscellaneous News.

IMPORTS AND EXPORTS FOR THE WEEK .- The imports of last week, compared with those of the preceding week, show a decrease in dry goods and an increase in general merchandise. The total imports were \$6,135,228, against \$6,226,757 the preceding week and \$7,473,101 two weeks previous. The exports for the week ended May 13 amounted to \$5,908,390, against \$6,080,721 last week and \$6,956,903 the previous week. The following are the imports at New York for the week ending (for dry goods) May 8 and for the week ending (for general merchandise) May 9:

#### FOREIGN IMPORTS AT NEW YORK FOR THE WEEK.

Dry Goods General mdse	1876. \$758,099 4,107,578	1877. \$1,252,852 5,510,745	1878. \$967,748 5,521,347	1879. \$1,039,919 5,095,309
Total week Prev. reported	\$4,865,677 116,778,431	\$6,763,597 116,460,263	\$6,489,095 102,301,236	\$6,135,228 109,065,208
Tot. s'ce Jan. 1	\$121,644,108	\$123,223,860	\$108,790,331	\$115,200,436

In our report of the dry goods trade will be found the imports of dry goods for one week later.

The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports for the week ending May 13:

#### EXPORTS FROM NEW YORK FOR THE WEEK.

For the week Prev. reported	1876. \$5,065,313 82,636,975	1877. $$4,031,748$ $92,321,728$	1878. $$6,298,636$ $120,333,912$	1879. \$5,908,390 109,517,913

Tot. s'ce Jan. 1.. \$97,702,288 \$96,353,476 \$126,632,598 \$115,426,303

The following will show the exports of specie from the port of New York for the week ending May 10, 1879, and also a comparison of the total since January 1, 1879, with the corresponding totals for several previous years:

FUNDING TEN DOLLAR CERTIFICATES.—The following was issued

Funding Ten Dollar Certificates.—The following was issued May 13 by the Treasury Department:

The demand for the \$10 refunding certificates has been so great that notwithstanding every effort of the Bureau of Engraving and Printing the supply of certificates does not equal the demand for them. At present the bureau is delivering them at the rate of about \$800,000 per diem. By Thursday the delivery will reach about \$1,000,000 per diem, and by the first of next week \$2,000,000 per diem. The certificates will be distributed in proper proportion among the different officers authorized to sell them, to be sold strictly and only upon the terms stated in the circular of April 28. The whole amount authorized is about \$10,000,000 and no more than that amount can or will be issued. About \$13,000,000 have already been sold.

MUTILATED BANK NOTES.—The following notice has been issued by the Treasurer of the United States:

MUTILATED BANK NOTES.—The following notice has been issued by the Treasurer of the United States:
Fragments of national bank notes redeemed by the bank of issue for less than their face value will be accepted by the Treasurer only when their valuation is equal to the face value of a note of some denomination issued by the bank or some multiple thereof. The required valuation may, however, be made up of several fragments of notes of the same or different denominations. In no other case can such fragments be disposed of under the regulations of the Comptroller of the Currency requiring national bank notes to be delivered to him for destruction in sums of even hundreds of dollars. The accumulation in his hands of fragments of which he is unable to dispose compels the Treasurer to adopt this rule.

INTEREST SAVED BY FUNDING OPERATIONS.—The following statement of the funding operations since March 1, 1877, has just been issued by the Treasury Department:

Amount of 4½ per cent bonds sold in

Amount of 4 <sup>1</sup> 2 per cent bonds sold in 1877, since March 1, for refunding	Bonds sold.	Interest saved.

Total bonds sold since March 1, 1877, for refunding purposes...... \$803,095,700 \$13,638,651 U. S. LEGAL TENDERS AND NATIONAL BANK NOTES.—From the Comptroller of the Currency, Hon. John Jay Knox, we have the following statement of the currency movements and Treasury

following statement of the currency movements and Treasury balances for three months past:

U.S. Bonds held as security for National Banks.—

Feb. 28. Mch. 31. April 30. Bonds for circulation deposited. \$21,690,700 \$12,281,250 \$12,036,450 Bonds for circulation withdrawn. 19,939,500 \$11,775,250 \$10,982,300 Total held for circulation. ... 350,690,400 \$351,196,400 \$52,250,550 Bonds held as security for deposits \$13,922,000 \$14,052,400 \$14,252,400 Legal-Tender Notes.—

Deposited in Treasury under act of June 20, 1874... \$710,700 \$1,118,400 \$663,190 Total now on deposit, including liquidating banks... \$12,312,812 \$12,800,698 \$13,356,239 Total entered under act of Jan. 14, 1875... \$55,318,984 \$35,318,984 \$35,318,984 \$75.

300,000 1,783,000 560,000 2,768,000 448,000 1,940,000

...........\$13,083,000 \$12,398,000 \$10,187,000

as the Pennsylvania Railroad adhered to its determination not to enter into another agreement, and its representative was not present, the meeting adjourned without action. The present rates are 15 cents on grain and 20 cents on fourth-class freight to New York; but there is no pretense of an agreement to continue them at those figures. The demand for cars is brisk now, and rates for lake transfer are firm at 3 cents for corn and 3½ cents for wheat to Buffalo."

Pacific Railroads.—Mr. French, Auditor of Railroad Accounts at Washington, has transmitted to the Secretary of the Interior a statement showing in detail the practical application of the Thurman Funding act—recently declared constitutional by the Supreme Court—to the business of the Union Pacific Company for the first six months after the passage of the act. A supplementary statement is also made, showing the present condition of accounts between the United States and the Union Pacific, by which it appears that upon the showing most favorable to the United States nearly \$10,000 are, nevertheless, due from it to the company.

favorable to the United States nearly \$10,000 are, nevertheless, due from it to the company.

Pittsburg Virginia & Charleston.—This road has been leased by the Pennsylvania Railroad Company. The road extends from Pittsburg to Monongahela City, thirty miles. The stockholders decided to cancel the present bonds and mortgages and issue new bonds at 6 per cent instead of 7 per cent, to be secured by a first mortgage on the property of the company. It was also decided to raise funds by issuing certificates of indebtedness, and proceed at once to advertise for proposals to

complete the road from its present terminus, Monongahela City, to a point opposite Brownsville, a distance of twenty-three miles. The estimated cost of the proposed extension will be about \$300,000.

about \$300,000.

Reading & Lehigh.—The United States Circuit Court has granted a decree of foreclosure and sale against this road under the mortgage for \$1,500,000 made by the Berks County Company in 1872. The road (originally the Berks County) extends from Reading, Pa., to Slatington, 43 miles, and was built as an extension of the Wilmington & Northern road, but became bankrupt soon after its completion, It was sold subject to the mortgage, and bought in by the floating-debt creditors, who organized the Reading & Lehigh Company, and leased the road to the Philadelphia & Reading Company. The Wilmington & Northern Company is considering the question of buying it and recovering control of its connection with the Lehigh Valley road.—Railroad Gazette.

St. Louis & San Francisco.—It is stated in a St. Louis paper

St. Louis & San Francisco.—It is stated in a St. Louis p that this company has purchased the Missouri & Western way, now completed and in operation from Price City, Mo., to Oswego, Kansas, for about \$1,250,000, and is now about to commence an extension of the same from Oswego, through the counties of Labette, Montgomery, Wilson, Butler and Sedgwick, to Wichita, a distance of about 145 miles.

St. Paul & Pacific.—The first of the sales of portions of this railroad, under foreclosure proceedings, took place in St. Paul on the 7th inst., covering the branch line from St. Paul to Watab. The sale was made, in fact, to transfer the road to the bondholders under the amicable arrangements made between the contestants. There was but one bid, that of J. S. Barnes, of New York, who bought the property for \$200,000.

Springfield Athol & Northeastern.—This road will be sold at Springfield, Mass., May 22, under foreclosure of mortgages. There are \$600,000 bonds outstanding, of which \$300,000 are a first lien on the older portion of the road, from Athol, Mass., to Barrett Junction, 30½ miles, and \$300,000 on the extension of 18 miles from Barrett's to Springfield.

Texas.-The Governor vetoed the bill appropriating money to pay the interest on the State debt, and the Senate failed to pass the bill over the veto, and the Legislature adjourned.

Toledo Peoria & Warsaw.—A despatch to the Inter-Ocean recently said: The rumor that the T. P. & W. R. R. had purchased the P. P. & J. R. R. is confirmed. The sale has been completed, and transfer will take place at once. They pay now \$15,000 rent for the use of the P. P. & J. track from Hollis to Peoria.

Wabash.—Stockholders of the Wabash Company representing 129,000 shares, over three-fourths of the capital stock, held a special meeting on the 14th, and unanimously agreed to

a special meeting on the 14th, and unanimously agreed to authorize the proposed issue of bonds to the amount of \$2,000,000 to retire the Seney mortgage, and for other purposes.

—In the suit of Holbrook against this company, brought on the first mortgage bonds of the Quincy & Toledo Railroad, before Judge Shope, of the Illinois State Court, in Brown County, the motion for the appointment of a receiver has been withdrawn, the Wabash Company having agreed to give bonds indemnifying the plaintiff pending the result of the action.

—Attention is called to the advantisement of the Atlanta

—Attention is called to the advertisement of the Atlanta. Cotton Factory ten per cent bonds. These bonds are secured by a mortgage, which is the only mortgage upon the company's property, and the bonds are due in five years—1884. The mill now runs 10,000 spindles, with a capacity of 26,000. It is estimated by the owners that a spindle will earn \$6 to \$6½ per year net, but the estimate of the income of the property is fixed at only \$5 per spindle, or \$50,000 per annum, while the interest on \$150,000 worth of bonds is only \$15,000, leaving a net surplus of \$35,000 to go as dividend on \$100,000 of capital stock. The trustees are well known as men of high standing, consisting of the Hon. Freeman Clarke, of Rochester, New York; H. B. Plant, of New York City, and Vincent R. Tommy, of Atlanta, Ga. The bonds are offered by the well known dealers in Southern securities, Messrs. Arents & Yaung, No. 9 New Street, N. Y., and only \$75,000 yet remain unsold.

—The capital of the Credit Lyonnais has been increased to -Attention is called to the advertisement of the Atlanta

—The capital of the Credit Lyonnais has been increased to 100,000,000 francs, of which 50 per cent is paid in, and the surplus now stands at 24,000,000 francs. The annual report of the corporation has just been issued, and copies may be obtained at the office in the Equitable Building. The report is much more extended than the bare statistical matters issued by our banks, and one of its features consists in the remarks made at some length by the annual exhibit. the Council of Administration in submitting the

-Particular attention is directed to the statement of the —Particular attention is directed to the statement of the Bank of British North America, showing the total debts and assets of the corporation at the close of 1878. The assets were then £3,736,770, and liabilities £2,586,355. An interesting exhibit is given of the notes in circulation and the specie held for each month of the year 1878, showing a large excess in the amount of specie over the notes outstanding.

-The Leadville Mining Co. have this day declared their 3d The Leadville Mining Co. nave this day declared their surgular dividend of 10c. per share, payable on and after June 7. The following has just been received from the superintendent at the mine: A large body of ore has been struck in the incline of the "Shamrock," which is one of this company's mines.

—The Homestake Mining Company has declared its dividend for April—30 cents per share—payable at Wells, Fargo & Co.'s, on the 26th. The product of the mine for twenty days in April was \$52,000

### The Bankers' Gazette.

#### NATIONAL BANKS ORGANIZED.

The United States Comptroller of the Currency furnishes the following statement of National Banks organized the past week:

2,424—Gate City National Bank of Atlanta, Georgia. Authorized capital, \$100,000; paid in capital, \$100,000. L. M. Hill, President; Lodowick J. Hill, Cashier. Authorized to commence business May 3, 1879.

#### DIVIDENDS.

The following dividends have recently been announced:

Name of Company.	Per	When	Books Closed.
	Cent.	Payable.	(Days inclusive.)
Railroad.	\$2 50	June 2.	

#### FRIDAY, MAY 16, 1879-5 P. M.

The Money Market and Financial Situation.—The general feeling in the financial markets has been quite as buoyant this week as at any previous time. It is not that the speculative stocks have all shown a large business or a further advance in prices, but the prevailing tone among business men in Wall street and its vicinity is one of more settled confidence in a period of growing activity in financial affairs, and possibly a time of rampant speculation. The improvement, both present and prospective, in transactions at the Stock Exchange is well shown in the advance which has taken place in the price of seats in the Board, which are now worth more than double what they sold for two years ago.

The money market has shown some irregularity this week, and an advance in rates to 7 per cent in exceptional cases. The only cause for this is found in the large withdrawals of money into the Treasury, as it is estimated that Secretary Sherman has called in about \$20,000,000 in the past week from the bankers who were owing for 4 per cent bonds. The rates for money to government bond dealers advanced to 4 per cent on Thursday, and on ordinary stock collaterals to 5@7 per cent; but this was temporary, and, the pressure being over, the rates to-day are 2@3 per cent on governments and 2½@5 on ordinary business.

The Bank of England statement on Thursday showed a loss of £268,000 in specie for the week, but the reserve was 51 1-16 per cent of liabilities, against 51½ per cent the previous week. The Bank rate of discount remains at 2 per cent, while money in the open market is about 1 per cent.

The last statement of the New York City Clearing-House banks, issued May 10, showed an increase of \$1,714,225 in the excess above their 25 per cent legal reserve, the whole of such excess being \$16,088,000, against \$14,373,775 the previous week.

The following table shows the changes from the previous week and a comparison with the two preceding years.

		Differ'nces fr'm previous week.		1877. May 12.

United States Bonds.—The demand for 4 per cents keeps up to a high figure, and the syndicate bankers have already sold about \$80,000,000 of the \$121,000,000 subscribed for by them. Included in these sales was the lot of \$15,000,000 taken this week by Messrs. J. S. Morgan & Co. of London, at full market prices, which are to be sent out from Washington direct, and credited to the syndicate. A large amount of called bonds is necessarily coming home from abroad, and this shipment to London is an exceedingly favorable transaction as helping to balance the exchanges.

Closing prices at the N. Y. Board have been as follows:

State and Railroad Bonds.—Southern State bonds are generally strong, except Louisianas, which remain stagnant at about 50. The discussions in the Convention at New Orleans are not very hopeful on the subject of taxation. Virginia bonds are strong on the prospect that the recent funding law will be carried out.

Railroad bonds are still active on a widely distributed business. The speculative bonds vary in prices somewhat, according to the tone of the market, but aside from these fluctuations the general tendency in bonds is toward higher rates. The Chicago St. Louis and New Orleans bonds have been placed on the Board list.

Messrs. A. H. Muller & Son sold the following at auction:

\* This is the price bid; no sale was made at the Board.

Railroad and Miscellaneous Stocks.—The general condition of the stock market is much the same as reported last week. The operations in fancy low-priced stocks continue to be a prominent feature of the transactions, while there is also considerable activity in the old favorites of the Stock Board. Western Union Telegraph has been about the leading stock of the week in strength and activity, and, so far as any definite information has been given out, there appears to be no other basis for this than the renewed rumor of a stock distribution. Rock Island is strong on the brief annual statement issued from the Company's office, showing net income for 1878-9 of \$3,196,380, against \$2,384,031 for 1877-8.

Total sales of the week in leading stocks were as follows:

		Wabash	St. Paul.	North- west.	West'rn Un. Tel.	Del. L. & West.	Erie.	Lake Shore.

Exchange.—There is some uncertainty felt about the future prices of exchange, owing to the large amount of securities to come from abroad. The \$15,000,000 4 per cents taken for London account this week had a good effect. The market for s'erling bills to-day was quiet and steady, the bankers asking 4.88 and 4.894 for long and short bills respectively, while the actual rates were 1.684 lower.

for long and short bills respectively, while the actual large 1@\frac{3}{4} lower.

In domestic bills the following were rates of exchange on New York at the undermentioned cities to-day: Savannah—selling 5-16, buying 1. New Orleans—commercial \frac{1}{2} premium, sank \frac{1}{2} premium.

St. Louis-50 discount. Chicago—weak, buying 1-10 discount, selling 1-10 premium; and Boston, shilling discount.

Quotations for foreign exchange are as follows:

The Investors' Supplement is published on the last Saturday of each month, and furnished to all regular subscribers of the Chronicle. No single copies of the Supplement are sold at the office, as only a sufficient number is printed to supply regular subscribers. One number of the Supplement, however, is bound up with The Financial Review (Annual), and can be purchased in that shape. in that shape.

### ANNUAL REPORTS.

Delaware & Hudson Canal Company.

(For the year ending December 31, 1878.)

Delaware & Hudson Canal Company.

(For the year ending December 31, 1878.)

The report of the business of the company for the year 1878 shows a profit on the business of the company proper of \$440,971 and a loss on the leased lines of \$498,562, leaving a net deficit of \$57,591. This result, less favorable than was reasonably anticipated, Mr. Dickson's report says, is chiefly due to the unsatisfactory manner in which the coal connage was managed by the recent association of the coal companies under their arrangement of January, 1878. "The unprecedentedly low prices that ruled during the last six menths of 1877 induced dealers in coal to accumulate stocks far beyond their immediate wants, and this fact, coupled with the exceptionally mild winter of 1877-8, enforced a large curtailment of mining for the first six months of 1878. Meanwhile prices gradually advanced to a fairly remunerative rate, and the prospects were very flattering for a profitable fall and winter business. Dealers were satisfied with the action of the associated companies, and, confident that their terms of arrangement would be carried out, responded to the changed condition of affairs. At this time, some of the companies, mistaking, perhaps, the real cause of improvement, and feeling the restrictions imposed upon mining to be burdensome, called for and obtained an increase of the allotments agreed upon from time to time. The natural effects followed this action; prices for coal were again demoralized, and producers and consumers alike lost all faith in the maintenance of the arrangement. Buying was again limited to immediate necessities, and a formal dissolution of the association followed on the 28th of December."

"The finances of the company are in a satisfactory condition. The proceeds of the new mortgage loan have been negotiated, and two millions five hundred and fifty thousand have been negotiated, and two millions five hundred and fifty thousand have been negotiated, and two millions five hundred and fifty thousand have been negotiated,

Georgia Railroad & Banking Company. (For the year ending March 31, 1879.)

The annual report just issued is quite comprehensive in its information and statistics, and the President, Mr. E. P. Alexander, has shown his purpose to place before the stockholders a full and fair exhibit of the affairs of the company.

INCOME STATEMENT.	
The income of the company from all sources was as	follows:
Net earnings of road	\$338,392
Net earnings of bank	12,633
Dividend on Atlanta & West Point Railroad stock	32,000
Dividend on Rome Railroad stock.  Dividend on Nashville & Chattanooga Railroad stock.	8,936
Western Railroad of Alabama, rent of rolling stock	4,500 13,500
Miscellaneous sources, coupons and interest	16,059
Total	\$426,022
This income has been applied as follows:	
Dividend No. 67, 3 per cent paid July 15th, 1878	\$126,000
Dividend No. 68, 3 per cent paid December 20th, 1878	126,000
Interest on bonds of this company	82,235
Interest on bonds Macon & Augusta Railroad Company Interest on bonds Western Railroad of Alabama \$93,080	51,777
Less paid by Western Railroad of Alabama 80,500-	12,580
Attorney's fees and costs	14,735
Incidental expenses of company	5,558
Taxes.	3,011
Balance	4,124
Total	\$426,022

OPERATIONS OF THE ROAD.

The following table exhibits the receipts and net earnings of the road for the past year, and also for 1877-8:

STATEMENT OF EARNINGS AND EXPENSES FOR THE YEAR ENDING MARCH 31 1877-8. \$ 154,993 36,902 1878-9 8 175,159 24,744 Local passengers.
Through passengers. 199,904 784,711 731.312 Total freight..... Mail.
Express and miscellaneous..... 997,718 Total expenditures....

Net earnings..... 286,012 338,392 \*Earnings and expenses for 1879 include those of Macon Railroad, 76 miles, for seven months.

Railroad, 76 miles, for seven mouths.

The earnings and expenses of 1879 are both increased by the earnings and expenses of the Macon & Augusta Railroad since September 1st, 1878. On that date it was taken possession of by the trustee, under the mortgage, and has since been run as a branch of this road, under arrangement with the trustee. For the purpose of comparison, therefore, the earnings and expenses of 1878 should be increased by those of the Macon & Augusta Railroad between September 1st, 1877, and March 31st, 1878, which were—earnings, \$69,749; expenses, \$60,027.

Adding these sums, therefore, to the figures given above for 1878, it will appear that the gross earnings of the whole property have decreased \$85,743, and the expenditures have decreased \$128,401.

"The principal causes of the decrease in gross earnings have

decreased \$128,401.

"The principal causes of the decrease in gross earnings have been a decrease of 22 per cent in the amount of fertilizers transported during the year, the loss of a large amount of Western produce for Augusta and the coast, which came in by way of Baltimore, Philadelphia and New York, during the war of the Trank lines to those ports during the past summer, and a demoralization of rates from the East, which prevailed at Atlanta and points west thereof during February and March. Unfortunately, we cannot hope for entire exemption from such losses in the future, and can only prepare to meet them by placing our property in such condition that we can afford to work at still lower rates."

### MACON & AUGUSTA RAILROAD.

2,314,268
587,185

439,610,006

1It has long been apparent that the earnings of the Macon & Augusta Railroad were entirely inadequate to maintain the road and pay the interest upon its bonded debt of \$400,000 first mortgage and \$370,000 second mortgage bonds.

The following statement shows a summary of its operations since December, 1866.

STATEMENT OF MACON & AUGUSTA RAILROAD OPERATIONS FROM DEC.

 14, 1866, TO SEPT. 1, 1878.

 Gross earnings from opening of road to Nov. 1, 1872.
 \$326,675

 Operating expenses for same period.
 428,708

Deficiency in net earnings, which amount the Georgia Railroad surrendered in the settlement of Nov. 1, 1872, so as to square the account between the two roads to that date ...... 102,032 Gross earnings from November 1, 1872, to September 1, 1878. Operating expenses for same period...... 640,901 576,666

Net earnings to Sept. 1, 1878, which amount has been earried to credit Macon & Augusta Railroad coupon account at Georgia Railroad Bank.

The Georgia Railroad & Banking Company is the endorser npon \$300,000 of the first mortgage bonds, and on the whole issue of the second mortgage, which latter becomes due July 1, 1879. With the necessary formalities, the trustee under the second mortgage bonds, Hon. Wm. M. Reese, took possession of the road Sept. 1st, 1878. As the road had no rolling stock, it was necessary to make some arrangement by which it could be operated; and we have agreed to operate it and allow for the credit of the Macon & Augusta Company, on account. \$2.000 per credit of the Macon & Augusta Company, on account, \$2,000 per

month.

WESTERN RAILROAD OF ALABAMA.

The Western Railroad of Alabama is owned jointly by this Company and the Central Railroad & Banking Company, who are joint endorsers on its bonds. This road has, during the year ending March 31st, paid the interest for which they are liable as endorsers, except \$12,580, and in addition has paid \$13,500 on rent of rolling stock.

The condition of this road is very good, and the prospects of its paying its interest in future, and gradually refunding what has previously been paid for it, are encouraging.

The following statement exhibits the business of the seven months, from September 1, 1878, to March 31, 1879, as compared with the same months of the preceding fiscal year:

7	months	ending
---	--------	--------

Receipts— Passenger Freight Express Mail Minor	$\frac{284,608}{4,714}$ $\frac{9,571}{}$	March 31, 1878. \$112,729 258,886 5,022 9,435 1,034
Total Operating expenses. Taxes. Rent rolling stock.	\$213,193 28,752	\$387,108 \$218,250 19,756
TotalNet		\$238,007 \$149,101

"The item of taxes for 1879, \$28,752, includes \$12,237 paid in compromise of a number of suits for large arrears of taxes claimed to be due for six years before the purchase of the road by this road and the Central, and the item rent of rolling stock is really net to us. A heavy blow, however, has fallen upon us in connection with this road during the past year, in a decision of the Supreme Court of Alabama, holding a part of this road liable for the outstanding income bonds of the Montgomery & West Point Railroad Company. Although the case is not yet terminated, it was deemed prudent in connection with the Central Railroad to offer a liberal compromise to the holders of these bonds, which nearly all have accepted. The amount we have paid in these settlements was \$132,217, and it will probably be increased to \$250,000 by the time they are finished. We have also redeemed during the year \$224,750 Montgomery & West Point first mortgage eight per cent bonds, and these two sums charged to purchase account of Western Railroad on the balance sheet of the company, have raised it from \$361,005, the amount last year, to \$817,973."

The President gives the following statement of the interest to be noted.

The President gives the following statement of the interest to be paid upon obligations, and what portion of it they may expect to derive from outside investments, during the current fiscal year, which gives a condensed view of the present situation.

tion :

Interest to be paid before dividends can be declared for year ending March 31, 1880.

On \$1,000,000 Ga. RR. 6
per cent bonds. \$60,000
On \$476,500 Ga. RR. 7 per cent bonds. 33,355
On \$670,000 M. & A. 7 per cent bonds. 46,900
On \$1,051,500 W.RR. 8 per cent bonds. \$4,120

Total \$150,600 Total .....\$159,620

Balance.....\$82,755 "Thus it appears in brief that the present situation of the company is that net earnings of \$82,755, equal to 1.97 per cent on capital stock, must be made by the road and bank during the next year for our creditors, and whatever is earned above that amount is available for dividends to stockholders and for retiring our obligations."

#### GENERAL INVESTMENT NEWS.

Atchison Topeka & Santa Fe-Denver & Rio Grande.— A press despatch from Denver, May 15, says: "In the suit between the Denver & Rio Grande and the Atchison Topeka &

Santa Fe Railroad Companies, growing out of the conflicting claims to the right of way through Arkansas Canon, the United States Circuit Court to-day gave the Atchison Company leave to file a supplemental bill and litigate thereby the question whether the Rio Grande Company, by lease and other contracts, admitted the right of the Atchison Company to continue its construction upon its located line. The Court also held that, in any view of the case, the road-bed of a rival company could only be appropriated, by payment of the cost of construction, justly computed; but the question of release raised by the supplemental bill must be first determined."

—The N. Y. World of the 15th says: "The Denver & Rio Grande Railway Company loses no time in taking advantage of the recent decision, April 21, of the Supreme Court of the United States, confirming to it the prior right of location for the main road and its several branches, all so connected as to constitute when completed an extended railway system for that entire region, conditioned on reaching a point opposite Santa Fe before June 8, 1882, and of completing 50 miles per annum thereafter. Three lines, amounting to 565 miles, are to be taken in hand immediately, as follows:

Miles.

From Canon City to Leadville and "Ten-mile" (through the Grand

rom Canon City to Leadville and "Ten-mile" (through the Grand Canon of the Arkansas). 150 com Alamosa, westward, to the San Juan mines. 210 rom Alamosa, eastward, to Abuquerque, N. Mex. 205

Total. 205

Total. 265

For these lines \$5,000,000 cash is required. The company will issue its first consolidated mortgage 7 per cent 30-year gold bonds, to be a first mortgage on the new lines and a second mortgage on the 337 miles already constructed. The bonds will be issued at not more than \$12,500 per mile, with the right reserved, after the completion of any division, to issue \$2,500 per mile in addition for any needed improvements, the total being thus limited to \$15,000 per mile. Subscriptions were invited this afternoon, at the office of Messrs. Woerishoffer & Co., No. 54 Exchange Place; subscribers to pay 90 for the bonds and receive a bonus of 5 shares (\$500) of stock with each \$1,000 bond, and the payments to be made in installments. More than the whole amount way subscribed in two hours, but the awards bond, and the payments to be made in installments. More than the whole amount was subscribed in two hours, but the awards will not be closed until Saturday, in order to make a fair apportionment to subscribers elsewhere, principally, we suppose, in Boston and Colorado. Here is the sum of \$5,000,000 very quickly pledged for the building of new railroads in the far West, a thing which has not been seen in New York for many a long day. It should be added that Denver & Rio Grande stock has risen to 34% from 31½ yesterday."

Chesapeake & Ohio.—This railroad company's purchase money funding bonds, 6 per cent mortgage gold bonds and 6 per cent mortgage currency bonds, and first and second preferred stock, have been placed on the Stock Exchange list.

ferred stock, have been placed on the Stock Exchange list.

Chicago Milwaukee & St. Paul.—The Chicago Inter Ocean publishes the following: "The Chicago Milwaukee & St. Paul Railroad Company will begin next week the laying of tracks on the important extension of the Prairie Du Chien Division. The present terminus is Pattersonville, twenty-three miles from the Great Sioux River, which is the boundary between Iowa and Dakota. In this space the roadbed is already made. Only a brief stop will be made at the State boundary, for during this year the rails are to be laid far into Dakota, to a distance of 190 miles from the present terminus. The line of the road will run about sixty miles north of the Missouri River most of the way, and will cross that river at or near Brule City, where the onward march of the iron horse toward the Black Hills, its ultimate stamping grounds, will cease for this year."

Chicago Rock Island & Pacific.—The following is an official statement of the earnings of the Chicago Rock Island & Pacific Railroad Company for the fiscal year ending April 1,

Gross earnings. Operating expenses, taxes, &c.	\$9,409,833 5,079,872

Net earnings.	\$2,384,031

Chicago St. Louis & New Orleans.—This Company's "Tennessee lien" bonds, of which \$1,199,000 are to be issued, have been placed on the Stock Board list; also first consolidated mortgage bonds, the total authorized issue being \$13,000,000; second mortgage bonds (interest for five years payable, if earned), of which the total authorized issue is \$8,000,000; and stock, the total authorized issue of which is \$10,000,000, although only \$8,663,650 have been issued. The road has a total length of 631 miles, and its bonded debt at present is \$17,621,500. \$17,621,500

thicago St. Paul & Minneapolis.—The shares have been

ti all rotte the test of potential to the test of the

an th ni

admitted to dealings at the Stock Exchange. There are 40,000 shares of the common and 10,000 shares of the preferred stock. This road is a connecting link of the Chicago & Northwestern, and extends from Elroy, Wis., to St. Paul. The Chicago St. Paul & Minneapolis has two western termini—St. Paul and Minneapolis. It is 198½ miles long, and with the exception of thirty miles, is laid with steel rails. It has 1,500,000 acres of land. There is no floating debt, and the company has a forty-years' contract with the Chicago & Northwestern for an exchange of business. of business.

Columbus Chicago & Ind. Central.—A large meeting of the first consolidated mortgage bondholders was held May 15, in response to a call issued by the committee appointed after the default in 1875. The object of the meeting was to take measures to conform to the terms of Judge Harlan's recent decision in favor of the Columbus Chicago & Indiana Central bondholders, and for this purpose the committee presented, through their counsel, Mr. Charles F. Southmayd, of Evarts, Southmayd & Choate, a report which is substantially as follows:

Judge Harlan's decision, while declaring the lease valid, requires the

ures to conform to the terms of Judge Harlan's recent decision in favor of the Columbus Chicago & Indiana Central bondholders, and for this purpose the committee presented, through their counsel, Mr. Charles F. Southmayd of Evarts, Southmayd & Choate, a report which is substantially as follows:

Judge Harlan's decision, while declaring the lease valid, requires the bondholders to reduce their bonded indebtedness to \$15,821,000 at 7 per cent interest, the residue to be represented by convertible income bonds, consisting of part of the \$10,000,000 issue. They are given until Jan. In Railroad Company may then apply to have the lease resended. Further argument is to be had before Judge Harlan at Chicago on June 2 to determine the terms of payment of the back rotals, amounts to date to \$3, 2000,000 or the first consolidated mortgage bondholders. There are outstanding sectional bonds which are a lien on the road prior to the \$3, 2000,000 or thereabouts. During the four years that the road has been in the receiver's hands, the net carnings, according to the sworn reports of the Pennsylvania Ediroad Company, have aggregated \$500,000 less in the receiver's hands, the net carnings, according to the sworn reports of the Pennsylvania Ediroad Company, have aggregated \$500,000 less than the road prior to the property of the pennsylvania Ediroad Company, have aggregated \$500,000 less than the road prior to the property of the pennsylvania Ediroad Company, have aggregated \$500,000 less than the road prior to the property of the pennsylvania Ediroad Company, have aggregated \$500,000 less than the road prior to the pennsylvania Ediroad Company, have aggregated \$500,000 less than the road prior to the pennsylvania Ediroad Company, have aggregated \$500,000 less than the pennsylvania to the pennsylvania Ediroad Company, have aggregated \$500,000 less than the pennsylvania to the pennsylvania to

to submit to it any longer. They gave notice that hereafter

they would consider themselves entitled to accept any advantageous proposal, and those who hung back could take the consequences of their inaction.

On motion it was unanimously resolved to approve the plan

of the committee, who were requested to have the necessary documents prepared for the acceptance of the bondholders. The meeting then adjourned.

Delaware & Bound Brook—Philadelphia & Reading.—
The Philadelphia & Reading has concluded arrangements for leasing the North Pennsylvania Railroad, which extends from Philadelphia to Bethlehem, a distance of 54 miles, and its laterals, comprising the Stony Creek road, the Northeast Pennsylvania, and the branch to Doylestown, and also the Delaware & Bound Brook road, from Philadelphia to Bound Brook, N. J. where it unites with the New Jersey Central The N. Y. N. J., where it unites with the New Jersey Central. The N. Y.

Times reports the lease for 990 years, being made for this term
because the Bound Brook road's charter is for 999 years, and a

because the discovistence have already passed. The conditions because the Bound Brook road's charter is for 999 years, and a few years of its existence have already passed. The conditions are that the Reading is to pay all interest on the bonds of both the main roads and the laterals, and the interest on the floating indebtedness at 6 per cent until the bonds are converted. The Reading also binds itself to pay dividends on the stock of both roads quarterly, on the 1st of February, May, August, and November. For the first two years it is bound to pay 6 per cent dividends; for the next two years following, 7 per cent, and for all subsequent years 8 per cent, free of all taxes. The bonded indebtedness of the Bound Brook road is \$1.500,000, and the capital stock about \$1,500,000. The bonded indebtedness of the North Pennsylvania is \$6,000,000, and the capital stock, \$4,500,000. stock, \$4,500,000.

Frankfort & Kokomo.—This railroad company's bonds, amounting to \$200,000, and stock, amounting to \$600,000, have been placed on the Board list. The road is only twenty-six miles long, and runs from Frankfort, Clinton County, to Kokomo, Howard County, Ind., connecting the Chicago Division of the Pan Handle Road and the Indianapolis Peru & Chicago Road with the Lafayette Muncie & Bloomington Railroad, and the Logansport Crawfordsville & Southwestern Railroad.

the Logansport Crawfordsville & Southwestern Railroad.

Kansas Pacific.—A decree for the foreclosure of the second land grant mortgage of the Kansas Pacific Railroad has been granted by the United States Court at Topeka, Kansas. This mortgage covered all the lands lying east of the 380th milepost, and the first land grant mortgage covered the same lands. The amount of bonds issued under the second mortgage was \$1,500,000. No interest has been paid on these bonds since 1876. It is said that the foreclosure of this mortgage is in accordance with the original plan of the "pool" for the re-construction of the Kansas Pacific Company.

A printed copy has just been issued of the new consolidated mortgage for \$30,000,000, into which the various classes of debt are ultimately to be funded. Concerning this the American

are ultimately to be funded. Concerning this the American Exchange says:

Excenange Says:

"Mr. Jay Gould and Mr. Russell Sage are named as trustees, and the amount of bonds authorized to be issued is \$30,000,000. The mortgage covers all the company's railroad, rolling stock and equipment, lands, land contracts and bills receivable, the sums payable by the United States to the company under the decision of the United States Supreme Court in the 'per cent' case, all extensions and branches of the railroad 'as may now or hereafter be authorized by law,' the bonds and stocks of other companies, and additional equipment, purchased or guaranteed, or whose roads shall be leased by the company, and various securities now owned by the company, embracing 29,996 shares of the stock of the Denrer Pacific Railway & Telegraph Company, \$\$20,000 bonds and \$720,000 stock of the Junction City & Fort Kearney Railway Company, &c.

now owned by the company, embracing 29,986 shares of the stock of the Denver Pacific Railway & Telegraph Company, \$820,000 bonds and \$720,000 stock of the Junction City & Fort Kearney Railway Company, & C. The company has already contracted with Messrs. Sidney Dillon, Russell Sage and Henry Villard for the conversion into \$3,400,000 consolidated mortgage bonds of the following securities held by them: \$754,000 funding bonds, \$75,4000 second land-grant bonds, \$75,000 Leavenworth Branch bonds, \$67,000 unstamped income bonds, \$75,000 Leavenworth Branch bonds, \$67,000 unstamped income bonds of the Arkansas Valley Railroad Company.

"For the conversion of the existing made debt of the company, it is proposed to issue \$24,000,000 in consolidated mortgage bonds, secured upon 673 miles of railroad and about 5,000,000 acres of land, and the remaining \$6,000,000 bonds are to be issued upon first-mortgage security of land, controlled or hereafter constructed roads, at a rate not exceeding \$15,000 for each mile east of the meridian of Denver, or \$25,000 for each mile east of the meridian of Denver, or \$25,000 for each mile east of the meridian of Denver, or \$25,000 for each mile east of the meridian of Denver, or \$25,000 for each mile east of the meridian of Denver, or \$25,000 for each mile east of the meridian of Denver, or \$25,000 for each mile east of the meridian of Denver, or \$25,000 for each mile east of the meridian of Denver, or \$25,000 for each mile east of the meridian of Denver, or \$25,000 for each mile east of the meridian of Denver, or \$25,000 for each mile east of the meridian of Denver, or \$25,000 for each mile east of the meridian of Denver, or \$25,000 for each mile east before the security of the security of

The Kansas Pacific foreclosure case in the United States District Court at Topeka, Kansas, has been postponed to the next term, in June, in the meantime, Mr. G. T. Smith, the receiver, continues in possession of the road.

Western Union Railroad.-The motion for an injunction and the appointment of a receiver in the foreclosure suit has been set for hearing May 20, by the United States Circuit

## The Commercial Times.

### COMMERCIAL EPITOME.

FRIDAY NIGHT, May 16, 1879.

We have seasonable weather at length and it gives a considerable impulse to some branches of trade. A "strike" of the stevedores employed by the European steamship lines has caused some embarrassment to exporters, except of grain, but it is believed that the trouble will be ended in the coming week. Commerce and manufactures make steady progress towards an improvement, not faster, however, than the situation seems to warrant; and the general tone of mercantile circles is quite cheerful, satisfaction being expressed with the situation at present and the prospects of the future.

The provision market has shown many points of improvement during the week. The advices from Chicago have been the stimulating influence, based upon a revival of speculation. In the matter of business, however, this market has not responded. To-day, sharp advances took place early in the day, sponded. To-day, sharp advances took place early in the day, with a better business, followed by a dull and declining market. Pork on the spot \$9.12½@9.50 for old, and \$10.15@10.25 for new mess; June sold at \$10.10@10.15; August \$10.20, and September \$10.30. Lard closed at 6.30c. for prime city on the spot, and 6.40c. for do. Western; do. for May 6.40c.; June sold at 6.37½c., July 6.52½@6.47½c., closing at 6.42½c.; August at 6.55@6.50c., closing at 6.47½c.; refined for the Continent quoted at 6.80c. Bacon declined to 5c. for long and short clear, 5½c. for short clear, 5c. for long clear. Butter and cheese now manifest much steadiness; the demands have latterly improved and arrivals have become more moderate. Tallow dull at 6½c. for prime.

Raw sugar has met with a good demand at a slight advance in prices, the quotations now being 614@62c. for fair to good refining Cuba. The strength of the raw market is mainly due to the activity and firmness of the refined product, which has also shown some advance. Crushed closes at 8%@834c.

Hhds. 27,160 25,965 Boxes. 1,309 2,664 26,255 13,521 Bags. 74,417 14,850 eccipts since May 1, 1879..... 45,497 39,944

Stock May 15, 1878. 39,947 26,255 744,723 2,230
Rio coffee has been moderately active at unchanged prices, fair cargoes still being quoted at 18c. Mild grades have been fairly active at the recent quotations. The sales have included 3,200 mats Singapore, 6,000 bags Maracaibo, 2,000 bags Costa Rica, and sundry lots of Mexican, Savanilla, African and Laguayra, within the range of the quotations elsewhere given. Molasses has generally been quiet at old prices, but latterly there has been a better demand for refining grades, and Cuba 50-test has ruled firm at 27½@28c. Rice has been active, both here and at the South, at higher prices, the market being stimulated by reports that the crop is likely to show a falling off this season.

Tobacco has been less active in the past week the same and a state of the same active in the past week the same and a same active in the past week the same and a same active in the past week the same active in the same active

here and at the South, at higher prices, the market being stimulated by reports that the crop is likely to show a falling off this season.

Tobacco has been less active in the past week; the only relief to absolute dulness in Kentucky stock has been a better demand for home consumption. The sales are 600 hhds., of which 100 for export and 500 for home consumption. Prices are unchanged; lugs 3@4½c. and leaf 5@12c. Seed leaf has moved rather slowly, the sales for the week aggregating only 761 cases, as follows: 264 cases 1878 crop, New England, seconds and fillers, private terms; 150 cases 1877 crop, Pennsylvania, 12c. to 20c.; and 97 cases 1878 crop, Wisconsin, on private terms. It will be observed that prices of the crop of 1878 are still withheld. Spanish tobacco in fair request, and sales include 500 bales Havana at 85c.@\$1 05.

Ocean freight room has received fair attention, both berth and charter descriptions; the latter have, perhaps, been relatively the steadier; but considering the influences exerted by liberal supplies of tonnage and the existence of a pertinacious strike of the 'longshoremen, rates can be considered as satisfactory. Late engagements and charters include: Grain to Liverpool, by steam, 5¼d., 60 lbs.; provisions, 25@22s. 6d.; otton, by sail, 5-32d.; grain to Glasgow, by steam, 6d., 60 lbs.; do. to Bristol, by steam, 7d., 60 lbs.; do. by sail, 4s. 6d. per qr.; do. to Cork for orders, 4s. 10½d.@5s.; do. to direct port in United Kingdom, 4s. 4½d.; do. to Oporto, 16½c. per bushel; refined petroleum to Bremen, 2s. 9d. per bbl.; do. to the Baltic, 4s.@4s. 1½d. To-day, business was limited, but rates unchanged; grain to Bristol, by steam, 7d.; do. by sail, 4s. 6d. per qr.; grain to Bordeaux, 4s. 3d. per qr.; do. to Naples, 4s. 6d.; do. to Antwerp, 4s. 3d.; do. to Rouen, 4s. 6d. Refined petroleum to Liverpool, 2s. 11d.; do. to Levant, 26½c. per case.

Naval stores have declined; during the past few days a good export trade has been done, particularly in rosins, but the market closes quiet at \$1 3

COTTON

FRIDAY, P. M., May 16, 1879.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening (May 16), the total receipts have reached 19,897 bales, against 19,031 bales last week, 22,283 bales the previous week, and 36,183 bales three weeks since; making the total receipts since the 1st of September, 1878, 4,355,935 bales, against 4,158,152 bales for the same period of 1877-9, showing an increase since September 1, 1878, of 197,783 bales. The details of the receipts for this week (as per telegraph) and for the corresponding weeks of four previous years are as follows:

Receipts this w'k at	1879.	1878.	1877.	1876.	1875.
New Orleans	3,500	4,833	7,188	6,655	5,439

731, foll

The market for cotton on the spot has been more active, and prices have advanced. On Tuesday afternoon there was a large business for home consumption, which was reported on Wednesday, and quotations were advanced 1-16c.; and on Wednesday afternoon 3,000 bales were sold for export, followed on Thursday, when reported, by a further advance of ic., to 12ic. for middling uplands, and at the same time the principal Southern markets were advanced †@‡c., with activity at New Orleans, where, alone, beside New York, is any considerable stock offered. To-day, there was a further advance of 1@5-16c., with middling uplands 12½c. The speculative movement in futures was comparatively moderate for the first half of the week, and prices variable, with a feverish, unsettled tone prevailing. Some of the "outside parties" to the recent speculation for a rise sold out and closed their accounts. The market was thus deprived of much of its support, and greatly improved crop accounts were added to the depressing influences. But on Wednesday, the advices from Liverpool and Manchester were unexpectedly strong and reassuring, causing an active renewal of speculation for the rise, which continued to near the close on Thursday, August advancing to 13·10, but there was some weakness at the close. To-day, there was a further advance of 12@15 points, part of which was afterwards lost.

The total sales for forward delivery for the week are 731,700 bales, including — free on board. For immediate delivery the total sales foot up this week 9.522 bales, including 3 000 for export, 5,850 for consumption, 478 for speculation, and 194 :: transit. Of the above, — bales were to arrive. The following tables show the official quotations and sales for each day of the past week: uplands 12 c. The speculative movement in futures was com-

the above, — bales were to arrive. The following tables sh the official quotations and sales for each day of the past week:

Price Mid. Upl., Liverpool			513 <sub>16</sub> d.	61sd.

\* We do not think these figures can be correct. The Liverpool stock last week was 485,000 bales American and 114,000 bales other descriptions

These figures indicate a decrease in the cotton in sight to-night of 519,135 bales as compared with the same date of 1878, a decrease of 1,031,071 bales as compared with the corresponding date of 1877, and a decrease of 914,455 bales as compared with 1876.

AT THE INTERIOR PORTS the movement—that is the receipts and shipments for the week, and stocks to-night, and for the corresponding week of 1878—is set out in detail in the following

100	Week en	ding May	16, '79.	Week en	ding May	17, '78.
Ve to all	Receipts	Shipm'ts	Stock.	Receipts	Shipm'ts	Stock.
Augusta, Ga	282	1,161	3,784	555	1,051	6,505
Columbus, Ga	214	366	3,342	227	1,606	2,200
Macon, Ga	95	220	837	64	165	2,107
Montgomery, Ala	378	511	2,768	469	1,331	4,832

Griffin, Ga	5		182		18	400
Atlanta, Ga	300	1,095	1,494	133	184	2,612
Rome, Ga	66	92	604	204	99	. 749
Charlotte, N. C	161	192	674	404	407	384
St. Louis, Mo	3,729	5,556	10,582	1,865	3,607	7,622
Cincinnati, O			5,276	4,320		6,290
Total, new p'rts	7,121	12,225	21,220	7,789	11,404	20,816
Total, all	9.667	21.964	59,249	12,211	21,548	56,433

The above totals show that the old interior stocks have decreased during the week 7,193 bales, and are to-night 2,412 bales more than at the same period last year. The receipts at the same towns have been 1,876 bales less than the same week last

RECEIPTS FROM THE PLANTATIONS.—The following table is RECEIPTS FROM THE PLANTATIONS.—The following table is prepared for the purpose of indicating the actual movement each week from the plantations. Receipts at the out ports are sometimes misleading, as they are made up more largely one year than another, at the expense of the interior stocks. We reach, therefore, a safer conclusion through a comparative statement like the following:

RECEIPTS FROM PLANTATIONS.

	eek	Receipt	ts at the	Ports.	Stock a	t Inter'	r Ports	Rec'pts from Plant'ns

The above statement shows-

The above statement shows—

1. That the total receipts from the plantations since Sept. 1 in 1878-9 were 4,409,532 bales; in 1877-8 were 4,193,103 bales; in 1876-7 were 3,921,877 bales.

2. That although the receipts at the out ports the past week were 19,897 bales, the actual movement from plantations was only 7,600 bales, the balance being drawn from stocks at the interior ports. Last year the receipts from the plantations for the same week were 10,760 bales, and for 1877 they were 4,968 bales.

WEATHER REPORTS BY TELEGRAPH.—The past week has been fairly favorable for the development of cotton, though in some ctions there are complaints. In the coast counties of Texas they are needing rain badly, and in portions of other States, especially Georgia, there has been too much rain, and the temperature too low. But in general we think the condition is improving.

Galveston, Texas.-The weather during the week has been warm and dry throughout the State, and the coast belt is beginning to need rain badly. Peaches and other early fruits are ripening. The thermometer has averaged 77, the extreme range having been 71 to 88.

Indianola, Texas.-There has been no rainfall during the week, and we are needing it badly. Average thermometer 80, highest 91, and lowest 69.

Corsicana, Texas.-We have had warm, dry weather the past week. The wheat harvest and other farm-work are active. The thermometer has averaged 73, the highest being 88, and the low-

Dallas, Texas.-It has not rained here the past week. The thermometer has ranged from 55 to 88, averaging 73. Continuous dry weather is wanted, for, while all crops are doing well, wheat is now being harvested. The wheat is turning out short in quantity, although excellent in quality. The increased cotton acreage is 25 to 35 per cent in North Texas, east of Brazos River.

Brenham, Texas.-The weather has been warm and dry throughout the week, just such as was desired. Crops are doing

throughout the week, just such as was desired. Crops are doing as well as possible, and fruits are moving to market. Average thermometer 78, highest 88, and lowest 72.

New Orleans, Louisiana.—There has been no rainfall the past week. The thermometer has averaged 74.

Shreveport, Louisiana.—The weather during the past week has been dry, and roads are in good condition. The thermometer has averaged 74, the highest being 87 and the lowest 61. The rainfall has reached two hundredths of an inch. River twenty-one feet. The cotton crop at Minden was damaged by a hail storm. The cotton crop at Minden was damaged by a hail storm

feet. The cotton crop at Minden was damaged by a hail storm on the fourteenth. Vicksburg, Mississippi.—Crop prospects are promising. Columbus, Mississippi.—The weather has been warm and dry throughout the week, the thermometer ranging from 75 to 83.

Little Rock, Arkansas.—Of the past week Tuesday and Thursday were cloudy, with light falls of rain, but the remainder of the week has been clear. The thermometer has averaged 71, ranging from 60 to 86, and the rainfall has reached thirty-six hundredths of an inch. hundredths of an inch.

hundredths of an inch.

Naskville, Tennessee.—We have had rain on three days the past week, the rainfall reaching one inch and fifty-nine hundredths, and it was greatly needed. The thermometer has averaged 70, the highest being 86 and the lowest 47.

Memphis, Teanessee.—There has been rain on three days the past week, mostly local, the rainfall reaching two inches and sixty-one hundredths. Considerable damage by cutworms isurged, but think no serious damage has been done, and but slight replanting will be necessary. The weather is too cold yet, but we have secured a good stand of cotton, and but little injury has been done. Average thermometer 72, highest 85 and lowest 51.

lowest 51.

Mobile, Alabama.—It has rained on two days this week, but the rainfall was too light to measure. Crop accounts are more favorable. The crop is developing promisingly. Average thermometer 73, highest 87 and lowest 57.

Montgomery, Alabama.—The earlier part of the past week was clear and pleasant, but during the last four days we have had a rainfall of two inches and one hundredth. We are having too much rain. The thermometer has averaged 72, the highest being 87 and the lowest 55. too much rain. The thermometer has averaged 72, the highest being 87 and the lowest 55.

Selma, Alabama.—It has rained during the week on two days.

Crop accounts are more favorable.

Crop accounts are more favorable.

Madison, Florida.—Rain has fallen on two days, but the balance of the week has been pleasant. The thermometer has averaged 72, the extreme range having been 62 and 82.

Macon, Georgia.—It has rained during the past week on four days. We are having too much rain. The days have been warm, but the nights have been cold, the thermometer averaging 69.

We have had an nausually severe storm this week accompanied. We have had an unusually severe storm this week, accompanied by hail. Crop accounts are less favorable. About one-third of the stand of cotton is poor, and the balance is fair, but very small and grassy. Crops in this section are fully two to three weeks behind lest very

the stand of cotton is poor, and the balance is fair, but very small and grassy. Crops in this section are fully two to three weeks behind last year.

Columbus, Georgia.—It has rained on one day during the week, the rainfall reaching twenty-two hundredths of an inch. The thermometer has averaged 75.

Savannah, Georgia.—It has been cloudy, with rain, every day of the past week, the rainfall reaching one inch and eighty-three hundredths. The thermometer has ranged from 53 to 87, averaging 70. averaging 70.

averaging 70.

Augusta, Georgia.—During the earlier part of the week we had a rainfall of thirty-six hundredths of an inch, rain having fallen lightly on three days, but the latter portion has been clear and pleasant. Crop accounts are less favorable, the wet weather of April having to a considerable extent made replanting necessary. Average thermometer 70, highest 82 and lowest 4.

Charleston, South Carolina.—It has rained on four days the past week, light showers. Average thermometer 70, highest 81 and lowest 55.

COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT .-A comparison of the port movement by weeks is not accurate, as the weeks in different years do not end on the same day of the We have consequently added to our other standing tables a daily and monthly statement, that the reader may con stantly have before him the data for seeing the exact relative movement for the years named. First we give the receipts at each port each day of the week ending to-night.

PORT RECEIPTS FROM SATURDAY, MAY 10, '79, TO FRIDAY, MAY 16, '79. 3

Tot	3,500	1,187	1,412	2,634	3,208	2,699	57	5,200	19,897

The movement each month since Sept. 1 has been as follows:

Monthly		Year	Beginnin	g Septemb	er 1.	
Receipts.	1878.	1877.	1876.	1875.	1874.	1873.
Sept'mb'r	288,848	98,491	236,868	169,077	134,376	115,255
October	689,264	578,533	675,260	610,316	536,968	355,323
Novemb'r	779,237	822,493	901,392	740,116	676,295	576,103
Decemb'r	893,664	900,119	787,769	821,177	759,036	811,668
January .	618,727	689,610	500,680	637,067	444,052	702,168
February.	566,824	472,054	449,686	479,801	383,324	482,688
March	303,955	340,525	182,937	300,128	251,433	332,703
April	167,459	197,965	100,194	163,593	133,598	173,986
Tot.Ap.30	4,307,978	4,099,790	3,834,786	3,921,275	3,319,082	3,549,894
Perc'tage	of tot. port April 30.	94.34	94.96	93.56	94.91	93.31

This statement shows that up to April 30 the receipts at the ports this year were 208,188 bales more than in 1877 and 473,192 bales more than at the same time in 1876. By adding to the above totals to April 30 the daily receipts since that time, we shall be able to reach an exact comparison of the movement for the different years.

	e of total ts May 16.		96.01	94.92	96:30	95:05

This statement shows that the receipts since Sept. 1 up to to-night are now 200,390 bales more than they were to the same day of the month in 1878, and 478,747 bales more than they were to the same day of the month in 1877. We add to the last table the percentages of total port receipts which had been received May 16 in each of the years named.

TEXAS FIRST COTTON BLOOM .- Mr. Mills, Secretary of the Galveston Cotton Exchange, kindly sends us the following letter with its enclosure.

GALVESTON, HARRISBURG AND SAN ANTONIO RAILWAY. SCHULENBURG STATION, May 7, 1879.

Mr. Mills, Sec. Cotton Ex.:

Dear Sir:—I herewith hand you the first cotton bloom of the season, same being from the farm of Mr. L. McKinnon, of Lavaca County. The heavy rains have somewhat retarded farming, but on return of good weather all are jubilant. Schulenburg to date has shipped fourteen thousand bales, and possibly by August 1st increase shipments to 500 more. Total, 14,500 bales.

Very truly yours, M. W. Young, Agt.

FACTS ABOUT LIVERPOOL AND MANCHESTER .- Our friends will find an article on this subject in our editorial columns which may be of interest to them.

BOMBAY SHIPMENTS.—According to our cable dispatch received to-day, there have been no bales shipped from Bombay to Great Britain the past week and 12,000 bales to the Continent: while the receipts at Bombay during this week have been 50,000

bales. The movement since the 1st of January is as follows. These figures are brought down to Thursday, May 15.

Shipments this week			Shipm	ents since	Receipts.		
Great Brit'n.	Conti- nent.	Total.	Great Britain.	Conti- nent.	Total.	This Week.	Since Jan. 1.
15,000	18,000	33,000	221,000	206,000 290,000 309,000	331,000 511,000 590,000	30,000	543,000 631,000 804,000

From the foregoing it would appear that, compared with last year, there has been a decrease of 21,000 bales in the week's shipments from Bombay to Europe, and that the total movement since January 1 shows a decrease in shipments of 180,000 bales, compared with the corresponding period of 1878.

GUNNY BAGS, BAGGING, &c.—Bagging has been in better demand since our last, and a firmer feeling is to be noted on the part of holders, who are not disposed to sell at less than full figures. There have been sales of 1,500 to 2,000 rolls, but the particulars are kept quiet. Quotations are 9@10e'4., according to quality. Butts are not in very large demand, and only about 1,200 bales are reported placed, and for these 2½@2 7-16c. were the figures paid. There is no change at the close, holders quoting 2½@2½c. for ordinary, while for good bagging quality 2½@2 7-16c. is demanded.

THE EXPORTS OF COTTON from New York this week show an increase, as compared with last week, the total reaching 5,737 bales, against 851 bales last week. Below we give our usual table showing the exports of cotton from New York, and their direction, for each of the last four weeks; also the total exports and direction since Sept. 1, 1878, and in the last column the total for the same period of the previous year

Below we give all news received to date of disasters to vessels carrying cotton from United States ports, etc.:

Below we give all news received to date of disasters to vessels carrying cotton from United States ports, etc.:

GANGES, steamer (Br.), Baker, from New Orleans via Key West for Idverpool, which put into Norfolk May 5, had broken her condenser. Robins (Br.) With reference to the statement as to the supposed stranding, near Reval, of the steamship Robins (Br.), from New Orleans, the master (Jones) wired his owners, under date of April 23d: "Robins not been aground as reported. Ship discharged. Commenced loading." Captain Jones attributes the report to the salvage men belonging to Nargen, the Robins having steered close to the north end of the island to obtain a pilot.

CHINA, ship, Barker, from New Orleans for Reval, struck the bottom at Lyngbye, Denmark. Assistance had been sent to her on May 7.

CONNEMAR. ship (Br.), Cameron, for Liverpool, before reported on fire at New Orleans, sailed for destination May 12.

MARCIA GREENLEAF, ship, from New Orleans for Reval, before reported at Queenstown April 24 leaky, was towed up the river to a dockyard for repairs April 29.

WETTERHORN, bark, from Galveston for Liverpool, had finished reloading her cargo at Bermuda May 7, and would be ready for sea in three or four days.

HERA (Ger.) On morning May 3 some fifty odd additional bales were gotten out of the hold of brig Hera (Ger.) ashore on Bird Island, Texas, and the buil was moved a length astern. The prospects for floating her off were very good, when the wind began to freshen and the brig was blown back to her original bed in the sand. The steam tug Nettle then went back to Galveston, leaving a force of men abourd the Hera to keep the rotary pump in motion. Later in the night these men sent up signals of distress and were rescued from their perilous situation by the lifeboat from the lightboat in the bay. The steam lighter Nettle, which proceeded to the stranded brig on P. M. of the 6th, returned with four bales of cotton and two iron water tanks taken from the vessel. The steam pump on the brig was put to work and a

LIVERPOOL.—By cable from Liverpool, we have the following tatement of the week's sales, stocks, &c., at that port

#### BREADSTUFFS.

FRIDAY, P. M., May 16, 1879.

There has been an upward tendency to prices of flour, and yet no further advance of moment can be quoted. This may be owing in some measure to the fact that assortments are much broken, and buyers have little encouragement in the nature of the offerings to make bids. It is evident that stocks have been run down pretty low, in anticipation of warm weather, and parties wishing desirable lines must give their orders for the same to the millers. To-day, there was a good shipping demand at \$3.65@4.15@\$5 for inferior to good and choice shipping extras.

The wheat market has been feverish and variable, and yet some advance has been made on the prices of last Saturday, notwithstanding the more favorable crop accounts from the Northwest, and the near approach of supplies through the Erie Canal. The export and milling demands have been good, but the chief strength has been speculative, based on the rapid reduction of the visible supply. Yesterday, No. 2 spring sold at \$1 05@\$1 081/2 on the spot, the latter figure for choice, and \$1 06½@\$1 07 for June; No. 2 amber, \$1 17@\$1 17½ on the spot; No. 2 red, \$1 17@\$1 18 for June; and No. 1 white, \$1 15@\$1 153/4 for May and June, and \$1 15 for July. To-day, the market was dull, and winter wheats fully 1/2c. lower.

Indian corn has been variable, showing in the aggregate some decline for the leading grades of mixed, while yellow and white have been not plenty, and sold at full prices for both Western and Southern. The weather has latterly been much more favorable for the crop in middle latitudes. The sales yesterday embraced No. 2 mixed Western, 451/4@451/2c. on the spot, 45@45%c. for May, 44%@44%c. for June, and 45%c. for July; steamer mixed, 45c. on the spot, 43%c. for early arrival, and 43c. for June. To-day, there was no essential change.

Rye was active and very firm early in the week, but latterly was quiet, and somewhat nominal. Barley has sold to some extent at 86 2c. for No. 1 Canada, and 75c. for No. 2 do. Oats have not been active, but with supplies quite moderate, both present and prospective, there is latterly a stronger market, especially for the medium grades. To-day, the market was steady, with No. 2 graded quoted at 351/4c. for mixed, and 39c. for white; No. 2 mixed Chicago in store sold at 341/4c.

#### THE DRY GOODS TRADE.

FRIDAY, P. M., May 16, 1879.

In volume the business of the past week has been fairly satisfactory for the time of year. There was a large movement in cotton goods (from agents' hands) on account of former orders, and the upward tendency of the great staples—wool and cotton—was reflected in a materially improved demand for fabrics composed wholly or in part of wool, flannels, Kentucky jeans, shirts and drawers; and some makes of men's-wear woolens were taken with such freedom by package buyers as to indicate the gradual development of speculation in the most staple goods. The jobbing trade has been devoid of animation, yet there was a steady demand for staple and department goods by near-by retailers, and orders to a considerable aggregate amount were received from distributors in the interior.

Domestic Cotton Goods.—There was a well-sustained demand for cotton goods by exporters, and the shipments from this port to foreign markets during the week ending May 13 aggregated 3,840 packages, viz., 1,641 to Great Britain, 1,000 to Africa, 539 to Brazil, 321 to U. S. of Colombia, 103 to Dutch East Indies, 48 to Hayti, 48 to British West Indies, &c. There was a steady inquiry for light re-assortments of brown, bleached and colored cottons by local and interior jobbers, and a large distribution of such fabrics was made by agents in execution of previous orders. The tone of the market continues very strong with a tendency to still higher prices, and stocks are unprecedentedly light for the time of year. Bleached cottons are in meagre supply and very firm, as are many makes of brown and colored cottons, cotton flannels, silesias, &c. Print cloths were less active, but firm at 4 1-16c.@4%c. cash for 64x64s and 31/2c. cash to 31/2c less 1 per cent cash for 56x60s. Prints ruled very quiet and there was a sluggish demand for ginghams and cotton dress goods; but printed lawns, corded jaconets, &c., continued in steady request.

Domestic Woolen Goods.—The main feature of the woolen goods market was a brisk and partly speculative demand for flannels and Kentucky jeans, in which very liberal transactions were reported. There was also an increased demand for heavy woolens by the clothing trade, and low and medium fancy cassimeres and cheviot suitings were disposed of by agents to an important aggregate amount. Worsted coatings received a fair share of attention, and considerable orders were placed for leading makes. Rough-faced and plaid-back overcoatings continued in steady request, and there was a moderate inquiry for Moscow beavers and cotton-warp beavers. For black cloths and doeskins there was only a hand-to-mouth demand, but prices ruled steady. Kentucky jeans met with liberal sales, and there was a fair movement in satinets. As above stated, there was a spirited demand for flannels, and stocks of some of the more popular makes were almost entirely closed out by agents.

Shetland shawls, but worsted shawls remained dull and unsettled.

Foreign Dry Goods.—Imported goods were generally quiet in first hands, and selections were mostly confined to small parcels of the most staple fabrics, and specialties in dress goods, silks, millinery goods, &c. There was a continued pressure to sell silks, and recourse was had to the auction rooms as a means of outlet with poor results. French buntings continued in fair request, but grenadines moved slowly, and there was only a moderate movement in cashmeres and beiges. Linen and white goods, embroideries, laces and hoisery, were severally in fair

Worsted dress goods were in fair request, as were lace and

demand and steady in price, but by no means active.

### Importations of Dry Goods.

The importations of dry goods at this port for the week ending May 15, 1879, and for the corresponding weeks of 1878 and 1877, have been as follows:

ENTERED FOR CONSUMPTION FOR THE WEEK ENDING MAY 15, 1879.

### Publications.

### The Christian Advocate, NEW YORK.

LEADING NEWSPAPER OF THE METHODIST EPISCOPAL CHURCH.

Circulation over 60,000 Copies Weekly.

### THE PUBLISHERS

Of THE CHRISTIAN ADVOCATE present to its readers, in its weekly issues, a paper SEC-OND TO NO OTHER PUBLICATION of its kind in the world in point of actual merit. That the membership of the Church appreciate this fact is evinced in the present large and STEADILY IN-CREASING CIRCU-LATION of the paper. It has a large local circulation in and around the cities of New York, Brooklyn. Jersey City and Philadelphia, and goes, also into every State and

Territory of the Union,

and Canada and Europe.

### BUSINESS HOUSES

Who are in the constant habit of using its Advertising Columns INDORSE IT HIGHLY as an Advertising Medium that it pays to patronize. Reason: Its readers are of the better class in every community where it circulates; in fact, just the people that first-class Business Houses desire to reach.

PARTICULAR AT-TENTION is given that no Advertisement calculated to mislead the readers of the paper is inserted.
